

Prof. Sheshanath V. Bhosale invited to be the guest editor of the special issue of the open access MDPI journal 'Symmetry'

[Prof. Sheshanath V. Bhosale](#), Department of Chemistry of Goa University has been invited to be the guest editor of the special issue of the open access journal 'Symmetry' monitored by prestigious citation databases such as *Web of Knowledge* as well as *Scopus*. The journal will be publishing a Special Issue on '[Nanocatalysis and Symmetry in Chemistry](#)'. This special issue is likely to be focusing on the advantages and challenges of nanostructured catalysts in view of their feasibility in the chemical industry with special emphasis on the effect of particle size and its morphology, as well as their symmetry towards optimizing the structure–activity properties of nanostructured catalysts that may provide valuable implications for the development of highly performing catalytic materials. Catalysis is a key

enabling technology today for developing the most feasible solutions towards a sustainable chemical industry. One more feather in the cap of Prof. Bhosale.

Congratulations Prof. Sheshanath Bhosale!
