

New Book release:

[Advances in Biological Science Research - A Practical Approach](#)

Goa University is happy to announce the publication of a new book *Advances in Biological Science Research - A Practical Approach* edited by Surya Nandan Meena and Milind Mohan Naik. The book was released by the Academic Press on 30 May 2019. Biological sciences are the study of life and living organisms, their life cycles, adaptations and environment. This book describes recent progress in a rapidly growing fields in biological sciences such as bioinformatics, genomics, metagenomics, proteomics, enzymology, agriculture and marine microbiology, bioremediation, medicinal chemistry, and nanotechnology. The book consists of a total of thirty one chapters, written by renowned researchers, 33 of them from Goa University and a few more graduated from Goa University in their respective fields of biosciences and currently working in other organizations of repute. Each chapter includes future advancements in the respective subject.

The editors of the book, [Dr. Milind Mohan Naik](#) has a PhD in microbiology and a faculty member in the Department of Microbiology at Goa University on the UGC-sponsored Microbiology (M.Sc.) innovative programme - Teaching and Research in Interdisciplinary and emerging areas and Dr. Surya Nandan Meena had completed his doctoral studies from Goa University recently and one of the active researchers in his field of specialization.
