Report on

State Level Workshop on New Dimensions of All India Survey of Higher Education (AISHE)

Higher education plays a significant role in the development of the country. All India Survey on Higher Education was initiated with an objective to collect the data from all the higher educational institutions on various aspects of education and to facilitate this, the higher educational institution created AISHE Cells and appointed Nodal officers/coordinator. With the implementation of New Education Policy 2020 higher education institutions also have to adapt to the new changes. It was felt necessary to have a workshop of faculty members of different programme and AISHE nodal officers to discuss the curriculum changes required for UG teaching and understand it under NEP 2020. Thus, the AISHE Cell of DIQA has organised One Day State Level Workshop on “New Dimensions of All India Survey of Higher Education”.

Objectives:

1. To discuss the curriculum framework for four-year undergraduate programme under new NEP to have better clarity and understanding among all the faculties of various colleges and Goa University
2. To discuss the revised NAAC guidelines and to learn from each other's best practices.
3. To understand the AISHE methodology and to discuss the difficulties encountered while collecting the entering the data.

Description of the workshop:

The one-day workshop was organized with twin aim of providing platform to the participants to discuss the important feature and implementation of the New Education Policy and All India Survey of Higher Education.

In the first session Prof. VMS Venekar has thrown light on the the main highlights of NEP 2020 and explained how it helps in identifying unique capabilities of students, provides learners flexibility in selecting subjects, multidisciplinary and other features. Some of the important points covered in the session are four year undergraduate programme, main features of curriculum, outcome based approach, broad disciplines of study for major and minor courses, etc.

In the second session Prof. S.N. Dhuri has guided the participants through all seven the NAAC criteria's of college and university and explained how the scores are calculated from each of these criteria's. He has also familiarized the participants with the recent changes in the NAAC criteria's. In the post lunch sessions Mr. Anthony Ferrao explained the process of AISHE undertaken for the year 2020-21 and where Goa colleges and University stand in these surveys. Prof. Jyoti Pawar spoke about the methodology and significance of AISHE data. They initiated the discussion on difficulties encountered by the AISHE coordinators in collecting data, understand and how to feed the data where the participants shared their experiences and learnt from each other. In the last session Prof. B.P.Sharad Chandran spoke about Academic Bank of Credit and how it works. He clarified many doubts raised by the participants about ABC.

Benefits of the workshop

Goa University has adopted NEP 2020 and implemented it for its post-graduate programme in the year 2022. It is implementing the same at the under- graduate level for the academic year 2023-24. Also associated with it is the implementing the Academic Bank of Credit. As still it is in the initial stage of implementation there are many queries about the framework and content of the curriculum to be developed as per the requirement of NEP.

The workshop provided an opportunity to the faculty members mainly involved in the designing the curriculum and coordinating the activities of NAAC and AISHE in their respective colleges and Goa University. The workshop provided them a platform the discuss their difficulties and learning from each other which otherwise would not have been possible. The resource persons who are the Chairpersons of the committee to implement the programme are able to resolve some of the issues in understanding the implementation of the policy.

AISHE coordinators were able to understand from each other the technical problems, problems associated with data collection and data feeding encountered by them. Resource persons helped the coordinators to avoid certain error committed by them while entering the data.
