Date:

PRESS NOTE

School of Biological Sciences and Biotechnology, Zoology Programme, Goa University is offering ONE Internship position to work on the Project entitled, "Documentation of Faunal diversity of Goa University campus", candidate with knowledge, work experience in field identification of Mammals, Amphibia, Reptilia, and odonatan taxa and have completed MSC in Zoology may apply for this position. For details, please visit Goa University website at www.unigoa.ac.in Interview will be held at 10.00 Am on 17th July 2023.

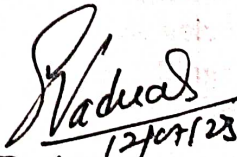

Focus of the research is to mainly study and document the diversity of fauna Goa University campus through field surveys. Project is funded by Goa University, Taleigao-Goa

Primary aim of the project is to add hitherto unknown information on diversity and distribution of fauna existing in the above-mentioned areas. This will help us to increase the conservation value towards better habitat management. Study will also initiate conservation awareness among fringe village areas. Besides acting as conservation reference for Goa the project will likely to contribute in filling up the lacuna in faunal knowledge.

The key output of this project will be to develop a comprehensive faunal database that can act as a resource for management and generation of widespread awareness among various section of society.
