

[Dr Digamber G. Porob](#), Associate Professor, School of Chemical Sciences have been invited to join the [International Union of Crystallography \(IUCr\)'s Commission on Powder Diffraction \(CPD\)](#) as a consultant. Dr Porob will be representing the whole of India at this commission and will assist them in fulfilling IUCr's mission. This is a good recognition for his domain expertise and extensive background in powder diffraction and industrial materials.

IUCr (<https://www.iucr.org/>) is the apex body for the Crystal structure related activities in all areas of science. The CPD (<https://www.iucr.org/iucr/commissions/powder-diffraction>) assists IUCr on matters concerning powder diffraction and promotes the scientific growth and development of the field of powder diffraction.

Being part of CPD, will give him access to knowledge and technology development in the area of Crystallography. He will also be able to connect to stalwarts in various branches of IUCr.

Heartiest congratulations Dr Porob!
