

MBT Silver Jubilee Lecture Series

Goa University has been successfully running the HRD programme of the DBT, (GOI, New Delhi), viz., the M.Sc. Marine Biotechnology programme which was initiated way back in 1988. This University was then the youngest and the smallest in the country to get this distinction.

The experience which the department gained over the years has helped to improve upon the infrastructure and start other programmes, drawing more students from the local Colleges.

This year being the *Silver Jubilee Year of Marine Biotechnology at Goa University*, the department is proud to initiate a Lecture Series.

The first Lecture will be held on 15 July 2013 at 3.00 PM, which will be delivered by a renowned scientist:

Prof. Dulal Panda

FNASC, FASC, Dept. of Biosciences & Bioengineering, Indian Institute of Technology, Mumbai.

The topic of the lecture will be:

“Dynamic Microtubules are attractive targets for Cancer Chemotherapy”

The venue is the Seminar Hall, New Science Faculty
Block E (Left wing).

All are cordially invited
