CIRCULAR

In supersession to the above referred Circular, the Syllabus of the **Bachelor of Arts in Psychology** Programme is attached with following changes:

- 1. Number of Credits for Course PSY-321 'Qualitative Data Analysis' shall be 3 Theory +1 Practical instead of 4 Theory.
- 2. Number of Credits for Course PSY 322 'Educational Psychology' shall be 3 Theory +1 Practical instead of 4 Theory.

The Dean/ Vice-Deans of the D.D. Kosambi School of Social Sciences and Behavioural Studies and Principals of the Affiliated Colleges offering the **Bachelor of Arts in Psychology** Programme are requested to take note of the above and bring the contents of the Circular to the notice of all concerned.

(Ashwin V. Lawande) Deputy Registrar – Academic

To.

- 1. The Dean, D.D. Kosambi School of Social Sciences and Behavioural Studies, Goa University.
- 2. The Vice-Deans, D.D. Kosambi School of Social Sciences and Behavioural Studies, Goa University.
- 2. The Principals of Affiliated Colleges offering the Bachelor of Arts in Psychology Programme.

Copy to:

- 1. The Director, Directorate of Higher Education, Govt. of Goa
- 2. The Chairperson, BOS in Psychology.
- 3. The Controller of Examinations, Goa University.
- 4. The Assistant Registrar, UG Examinations, Goa University.
- 5. Directorate of Internal Quality Assurance, Goa University for uploading the Syllabus on the University website.

SEMESTER I & II

Name of the Programme : BA PSYCHOLOGY

Course Code

Course Code : PSY-100

Title of the Course : ESSENTIALS OF PSYCHOLOGY

Number of Credits : 3+1

Effective from AY : 2023-24

Effective from AY	: 2023-24	
Pre-requisites	Nil	
for the Course:	6/4-18-8/0	
Course Objectives:	 Understand the subject of psychology as a science Understand psychological processes and conduct basic experime psychology. Develop knowledge of cognitive processes 	nts in
		No of Hours
	CHAPTER I: NATURE OF PSYCHOLOGY	
Content:	 Psychology as a Science: Beginnings of psychology as a science, scientific way of thinking, Scientific method. Applied Psychology & Psychology Careers Psychology as a Career & Mental Health Professionals, Psychology & Work, Psychology Beyond the Classroom, Psychology & Law, Sports Psychology, Psychology in India Contemporary Approaches to Psychology: Behavioral, Psychodynamic, Cognitive, Sociocultural Approaches, Humanistic Movement and Positive Psychology Skilled Based Activities: Interviewing mental health professionals, Field visits to relevant industries to observe the process of appraisal and organizational procedures after which students will have to compile a report. 	15
	 CHAPTER II: BASIC CONCEPTS OF PSYCHOLOGICAL PROCESSES States of consciousness: Normal waking consciousness (Directed consciousness, Flowing consciousness, Divided consciousness), the unconscious mind and altered states of consciousness (Meditation, Hypnosis, Mesmerism, Depersonalization, Near death experiences) Emotions: Nature and types of emotions, expression of emotions (cultural and emotional expressions and labelling) managing negative emotions (management of examination anxiety) and enhancing positive emotions (emotional intelligence) Motivation: Types of motives and Maslow's hierarchy of needs Skill based activities: Maintaining journal of emotions, use of psychological test to understand ones own nature of motivation 	15

8

	CHAPTER III: BASIC COGNITIVE PROCESSES -1	
	1. Nature of Sensation and Perception: Dimensions of Perception,	
	Mental imagery	
	2. Learning and memory: Types of learning, Conditioning: Classical	
	and Operant and Observational Learning Memory: Stages of	
	Memory: Encoding, Storage, Retrieval; Methods of Retention:	
	Recall, Recognition, Relearning; Memory enhancement	
	techniques and study habits	15
	3. Problem Solving and reasoning: Trial and error, algorithms,	
	heuristics – Availability heuristic, Representative heuristics	
	Anchoring and adjustment, Escalation of commitment, Emotions	
	and decision making, Naturalistic decision making	
	Reasoning: Deductive and Inductive reasoning, creativity.	
	Skill based activities: Use of mnemonic devices to learn and	
	forming a study habit calendar	
	PSYCHOLOGY PRACTICUM	
	Experiments: Any 5 from the list given below	
	Learning efficacy of meaningful and meaningless verbal material	
G G

(October 1974)	3.7	Adjusting to a chronic illness- Initial Reactions to Having a Chronic	
		Condition, Influences on Coping with a Health Crisis, The Coping	
Content:		Process	
	CH	APTER 3: STRESS-PREVENTION STRATEGIES	
	1.	Reducing the Potential for Stress- Enhancing Social Support,	
		Improving One's Personal Control, Organizing One's world Better,	
		Exercising: Links to Stress and Health, Preparing for Stressful Events	
	2.	Reducing stress: Behavioral and cognitive methods- relaxation,	
		biofeedback, systematic desensitization, modeling, Approaches	05
		Focusing on Cognitive Processes.	
		Specific Coping Strategies – Problem solving, Catharsis, Crying, Faith,	
		Meditation, Humour, Distraction	
		Emotion focused coping: Enhancing emotional awareness, releasing	
		pent-up emotions, managing hostility and forgiving others.	
	PRA	ACTICUM COMPONENT	
	1.	Conduct Psychological test to measure any two aspects of their	60
		personality	

- Any test measuring psychological aspects of perceived stress, burnout, stress coping techniques (Eg: Stress coping techniques questionnaire, Academic Stress Questionnaire, Students' Stress Scale for University Students)
- Any test measuring physiological symptoms of stress
- Any 2 scales on determinants of stress: stress-prone or stressresistant personality traits; locus of control; self-esteem; social support; optimism/ pessimism; assertiveness
- 2. Experiential exercises any two
- Impact of external stress on task performance (Repeated measures design- same task to be performed in external pressure and no pressure situation- scores and introspective report to be analyzed)
- Impact of rational/ positive thinking on stress (Participants are to be provided a vignette in which they imagine themselves in a stressful situation- in the first conditions they can be asked to imagine all things that can go wrong/ catastrophize, in the second they have to think of the same situation in a positive/ rational light- their selfreports of stress to be compared in both situations)
- Impact of learned helplessness on problem solving (Participants divided into 2 groups of 3 participants each; and are given 3 anagram word problems to solve; Group 1 given 2 impossible problems and 1 possible problem; Group 2 given all possible problems: Participants asked to raise hands after completion of task- Group 1 may develop learned helplessness and not attempt problem solving in the third task, even though the task is the same as given to group 2)
- Impact of humour/ laughter on mood (8-9 participants can be asked to participate in a laughter therapy exercise/ hans yoga- for 10 minutes and introspective report to be taken on each participant's mood before and after experiment- comparison of introspective report for analysis)
- 3. Qualitative Practicum:
- Focus group discussion (with 5-8 participants), or interviews (with minimum 3 participants) or survey (around 25 participants) on coping strategies used in times of academic stress- - compilation of data to be done in practical batches- for coding common emerging themes
- Time management and stress: Design and maintain a time table for a week and follow it- write a report on how it impacts stress management- compilation of data to be done in practical batchesfor coding common emerging themes
- 4. Workshop/ skill training

Practice any one technique within yoga or meditation (eg: breathing techniques/ pranayam, or Asana) for 2 weeks and maintain a diary about how it is impacting sleep, positive/negative thoughts, physical stress symptoms (eg: pain) and general stress in life compilation of data to be done in practical batches- for coding common emerging themes Or Plan & maintain personal fitness program, Workshop on healthy eating/nutrition and maintain a diary about how it is helping them manage their schedule 5. Each batch of students should plan, design, and conduct structured exercises on any of the following areas: Self-awareness; decision making and problem solving; behaviour modification; conflict management; goal setting; wheel of wellness; stress awareness diary; healthy diet and nutrition; fitness; gratitude journal 1. A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. 2. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, Pedagogy: during lectures. 3. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics. **BOOKS FOR STUDY:** 1. Andrews, T. (2016). The Healers Manual. Minnesota. Llewellyn Publications. 2. Carr, A. (2004). Positive Psychology: The science of happiness and human strength.UK: Routledge. 3. Duffy K.G., Atwater E., Kirsh S.J. (2015) Psychology for Living: Adjustment, References/ growth and behaviour today. (11th Ed.) India. Pearson Education. Readings 4. Sarafino, . E. P. & Smith, T.W.(2014). Health Psychology., Biopsychosocial. New Delhi. Wiley India Pvt.Ltd. 5. Weiten, W. & Lloyd, M.A (2007). Psychology applied to modern life. New Delhi: Thomson Delmar Learning. 6. Davis, M., Eshelman, E., & McCay, M. (2019). The relaxation and stress reduction workbook (7th ed.). Oakland, CA: New Harbinger. At the end of this course, the learner will be able to: 1. Identify and understand the meaning of stress. Course 2. Distinguish methods to control and reduce stress in their daily life. **Outcomes:** 3. Apply stress management techniques. 4. Explore the relationship between stress, and health 5. Develop a personal stress management plan.

EXIT COURSE

Name of the Programme : BA PSYCHOLOGY

Course Code : PSY-161
Title of the Course : MINDFULNESS
Number of Credits : 4 (2+2)
Effective from AY : 2023-24 : 2023-24

Effective from A1	: 2023-24	
Pre-requisites	It is considered an exit course in psychology and hence students shou	ld
for the Course:	meet the criteria for exit with a major paper in psychology	
Course Objectives:	 Understand the basic principles and concepts of mindfulness Appreciate the connection of mental health and well-being, Develop the ability to be fully present, with attention to the proment. Learn the skills of mindfulness practices and meditation. 	oresent
	2-2	No. of
	UNIV	Hours
AINVE	UNIT1: PRINCIPLES OF MINDFULNESS A: UNDERSTANDING MINDFULNESS i. Definition of mindfulness and its origins ii. Developing mindfulness	10
	iii. The benefits of mindfulness iv. Emerging science of mindfulness	
W (CO)	B: MINDFULNESS OF THE BODY AND THOUGHTS	<u> </u>
	i. Introduction to mindful breathing ii. Recognizing and understanding thoughts	10
Town factors	iii. Cognitive diffusion	N.
Committee of Division	C: MINDFULNESS IN DAILY LIFE	
	i. Importance of gratitude	
	ii. Mindfulness and self-care	10
Content:	iii. Mindful communication	
	iv. Mindful technology use	
	UNIT 2: PRACTICING MINDFULNESS	
	i. Mindful breathing exercises (Body scan and awareness	
	breathing)	
	ii. Mindful eating and drinking	
	iii. Mindful walking	
	iv. Mindfulness forgiveness	60
	v. Gratitude letters	-
	vi. Gratitude practices eg gratitude tree/jar/garden	
	vii. Mindful Journaling	
	viii. Mandala	
	ix. Mindful listening	
	x. Loving-kindness meditation	

	 Students have to choose a minimum of 06 activities from the above mindful practices and practice each of them for a minimum of 10 hours each Evaluation of the student would be based on viva and the ability to demonstrate or teach any one of the above mindful (modification skills)
Pedagogy:	 /meditation skills A blend of traditional teaching techniques, experiential-based exercises and workshops Tools such as group discussions, role play, and sharing of experiences, among others, during interactions.
	3. Field trips to nature are encouraged to enhance the mindfulness experience.

	10. Hanh, T. N., & Cheung, L. (2011). Savor: Mindful eating, mindful life. San Francisco: Harper One.
	At the end of this course, the learner will be able to:
	1. Understand the basic principles and concepts of mindfulness.
Course	2. Develop the ability to focus their attention on the present moment.
Outcomes:	3. Explain the various mindfulness practices in daily activities.
	4. Incorporate mindfulness into daily life and maintain a regular mindfulness practice.

SEMESTER III

Name of the Programme : BA PSYCHOLOGY

Course code : PSY-200

Title of the Course : ATTITUDES AND SOCIAL COGNITION

Number of Credits : 3T + 1P Effective from AY : 2024-25

Effective from AY	: 2024-25	
Pre-requisites	The student should have completed the basic psychology course	es in the
for the course	previous semester.	
Course Objectives:	 Evaluate the processes of attitude formation. Comprehend the causes of stereotypes. Assess non-verbal communication along with its various char understand the concept of impression formation. 	inels and
		No. of Hours
Same and the same	 CHAPTER I: ATTITUDE Nature and origin of attitudes Processes of attitude formation: Classical conditioning, Instrumental conditioning, and Observational learning. Emotions and attitude change. The science of persuasion: How attitudes are changed? Persuasion (Communicators, Messages, and Audience), The cognitive processes that underlying persuasion and systematic vs heuristic processing. The power of advertising: How advertising works and Subliminal advertising. Resisting attitudinal / persuasion attempts: Reactance. Forewarning, Selective avoidance, Counterarguing, Individual differences and Ego depletion. 	12
Content:	 CHAPTER II: STEREOTYPES, PREJUDICE AND DISCRIMINATION. Nature and origins of stereotyping: Defining Prejudice, Cognitive component: (Stereotypes), Affective component: Emotions (Prejudice), and the behavioural component: (Discrimination). Causes of prejudice: Pressures to conform: Normative rules, Social identity theory: US versus THEM (Ethnocentrism, Ingroup bias, Outgroup homogeneity, Blaming the victim and Justifying feelings of entitlement and superiority), and Realistic conflict theory. Techniques for countering /reducing prejudice: Learning not to hate, Benefits of contact, Recategorization, Guilt and prejudice reduction, Saying no to stereotypes and biased attributions and Social influence. (field trip to NGO working with discriminated populations) 	11

1. Heuristics and types: Representativeness, Availability, and Anchoring and Adjustment. 2. Schemas: Impact of schemas on social cognition (Attention, encoding and retrieval, Priming and Schema persistence). 3. Sources of error in social cognition: Optimistic bias, Negativity bias and Counterfactual thinking. 4. Non-verbal communication: Basic channels (Facial expressions, Eye contact, Body language and Touching). 5. Theories of attribution: Jones and Davis Correspondent inference theory and Kelley's covariation theory. 6. Basic sources of error in attribution: Correspondence bias, Actor observer effect and Self-serving bias. CHAPTER IV: SOCIAL PERCEPTION 1. Impression formation: Foundational research on first impressions (Central and peripheral traits), How quickly and accurately are first impressions formed and Can first impressions be changed? 2. Impression management: Tactics for looking good and how well do impression management tactics work? 3. Cognitive dissonance: Theory of cognitive dissonance. 4. Strategies for avoiding dissonance: post-decision dissonance, Illusion of irrevocability hypothesis, justification of effort, Counter-attitudinal behavior, justifying cruelty, justifying our immoral acts, Avoiding temptations and The hypocrisy paradigm. PSYCHOLOGY PRACTICUM Experiments: Any 05 from the list given below 1. Impression formation 2. Reliability of testimony/Suggestibility 3. Serial position effect in learning 4. Judgement of emotions from facial expressions 5. Word superiority effect (Coglab) 6. Verbal conditioning 7. Bystander effect 8. Conduct an interview (sample size = 5) to study any one of the following: Effect of advertising on consumer behaviour, Tactics of compliance, Impression management among college students Psychological Tests: Any 03 from the list given below 1. Conformity Scale 2. Prejudice Scale			
Anchoring and Adjustment. 2. Schemas: Impact of schemas on social cognition (Attention, encoding and retrieval, Priming and Schema persistence). 3. Sources of error in social cognition: Optimistic bias, Negativity bias and Counterfactual thinking. 4. Non-verbal communication: Basic channels (Facial expressions, Eye contact, Body language and Touching). 5. Theories of attribution: Jones and Davis Correspondent inference theory and Kelley's covariation theory. 6. Basic sources of error in attribution: Correspondence bias, Actor observer effect and Self-serving bias. CHAPTER IV: SOCIAL PERCEPTION 1. Impression formation: Foundational research on first impressions (Central and peripheral traits), How quickly and accurately are first impressions formed and Can first impressions be changed? 2. Impression management: Tactics for looking good and how well do impression management tactics work? 3. Cognitive dissonance: Theory of cognitive dissonance. 4. Strategies for avoiding dissonance: post-decision dissonance, Illusion of irrevocability hypothesis, justification of effort, Counter-attitudinal behavior, justifying cruelty, justifying our immoral acts, Avoiding temptations and The hypocrisy paradigm. PSYCHOLOGY PRACTICUM Experiments: Any 05 from the list given below 1. Impression formation 2. Reliability of testimony/Suggestibility 3. Serial position effect in learning 4. Judgement of emotions from facial expressions 5. Word superiority effect (Coglab) 6. Verbal conditioning 7. Bystander effect 8. Conduct an interview (sample size = 5) to study any one of the following: Effect of advertising on consumer behaviour, Tactics of compliance, Impression management among college students Psychological Tests: Any 03 from the list given below 1. Conformity Scale 2. Prejudice Scale		CHAPTER III: SOCIAL COGNITION	
2. Schemas: Impact of schemas on social cognition (Attention, encoding and retrieval, Priming and Schema persistence). 3. Sources of error in social cognition: Optimistic bias, Negativity bias and Counterfactual thinking. 4. Non-verbal communication: Basic channels (Facial expressions, Eye contact, Body language and Touching). 5. Theories of attribution: Jones and Davis Correspondent inference theory and Kelley's covariation theory. 6. Basic sources of error in attribution: Correspondence bias, Actor observer effect and Self-serving bias. CHAPTER IV: SOCIAL PERCEPTION 1. Impression formation: Foundational research on first impressions (Central and peripheral traits), How quickly and accurately are first impressions formed and Can first impressions be changed? 2. 	relationship breakdowns in diverse contexts.

Course code : PSY-241

Title of the Course : DEVELOPING PSYCHOLOGICAL SKILLS

Number of Credits : 3 (1 +2) Effective from AY : 2024-25

Effective from A1	. 2024-25		
Pre-requisites	The student should have completed the basic psychology courses in the		
for the course	previous semesters		
Course Objectives:	 Comprehend the basic skills involved in psychological inquiry pro Understand the fundamentals of psychological first aid and its providing immediate support to individuals experiencing tracrisis. Develop skills in dealing with different crises. 		
		No. of hours	
Content:	CHAPTER I: PSYCHOLOGICAL INQUIRY PROTOCOL: THE INTERVIEW 1. Types of interviews 2. Arrangements for the interview 3. Stages in the initial assessment: Opening phase, middle portion, Final phase 4. Communication: Language and non-verbal CHAPTER II: SKILLS IN PROVIDING PSYCHOLOGICAL FIRST AID (PFA) 1. Understanding PFA: Overview of PFA principles, objectives, and its role in immediate crisis support. 2. Basic skills of psychological first aid: Look, listen, and link 3. Assessing immediate needs, prioritizing interventions, and delivering appropriate PFA strategies in different contexts, such as natural disasters, accidents, or community crises, psycho-education, making referrals	05 05	
	 CHAPTER III: COMPLEX REACTIONS AND CRISES RESPONSE SKILLS: 1. Different types of crises: personal, social, health challenges, natural disasters, men made disasters, violence 2. Different complex reactions during crises: panic and anxiety, anger and aggression, self-harm and suicide, prolonged grief, sleep problems, PTSD, flash backs, depression 3. Active listening, empathy, and effective communication strategies in crises. 4. Ethical Considerations: maintaining confidentiality and respecting boundaries, addressing cultural variations in psychological distress, ensuring sensitivity to diverse backgrounds. 	05	

PRACTICUM COMPONENT

Conduct of Any two psychological inquiry mock interviews

- 3 Case study analysis of crises intervention: Evaluate the effectiveness of psychological first aid interventions through case studies, research findings, and real-world examples, considering both short-term and long-term outcomes.
- The Case Studies should analyse real or hypothetical case studies that involve complex psychological issues.
 Participants can then collaboratively develop intervention strategies, fostering critical thinking and problem-solving skills.

Qualitative Practicum:

- Focus group discussion (with 5-8 participants), interviews (with minimum 3 participants), or survey (around 25 participants) on strategies used in times of crises. Adaptive coping, maladaptive coping, and addressing highly negative emotions (guilt and shame). Compilation of data to be done in practical batches- for coding common emerging themes.
- Qualitative assessment: Diary methods in psychological research: Entries related to qualitative analysis of feelings/emotional well-being; observing students' progress through the semester.
- Reflective Journaling: Incorporate reflective journaling as a practicum component, encouraging participants to document their experiences, emotions, and insights during simulated or real-life situations. This promotes selfawareness and continuous improvement.
- Assessment and Prioritization: Training on assessing immediate needs and prioritizing interventions based on the severity of psychological distress.
- Multicultural Sensitivity Training: Design exercises and activities that focus on developing cultural competence and sensitivity. This can include scenarios that challenge participants to adapt their psychological skills to diverse cultural contexts.

A minimum of 06 entries and a maximum of 10 hours have to be journaled by the student.

The format to be followed in dairy entries (minimum 5) is as follows:

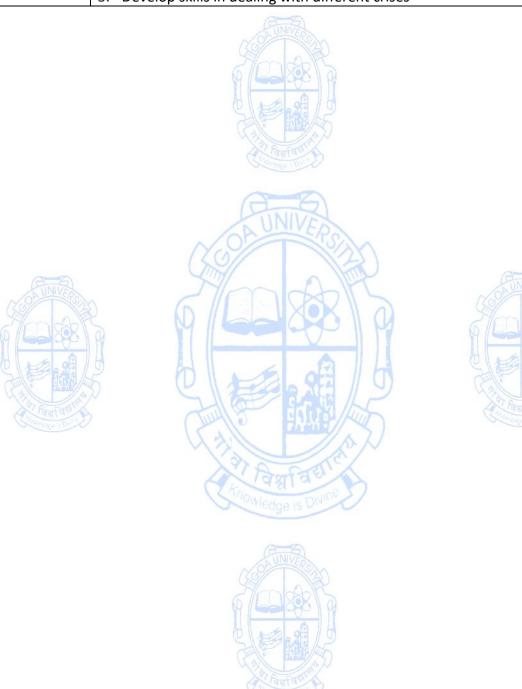

Reflection questions:

Incident: (Description): What happened

	Insight and awareness: What were you thinking and feeling
	(Cognitive process and emotional awareness)
	Evaluation: what was good and bad about the process?
	Analysis: what sense can you make about the process?
	Conclusion: What else could you have done?
	Action plan: if it arose again what can you do?
	Workshop/ skill training: (any two of ten hours each)
	Anger management after a traumatic experience Discuss
	how the anger is affecting their life (for example,
	relationship with family members and friends, parenting).
	Crisis Simulation Exercises: Develop crisis simulation
	exercises to help participants navigate and respond to
	simulated psychological emergencies. This could include
	scenarios like natural disasters, accidents, or community
	crises.
	 Role-Playing Scenarios: Create realistic role-playing
	scenarios that simulate various psychological challenges,
(3.6)	allowing individuals to practice and refine skills such as
AUNIVERS	active listening, empathy, and providing support in
	different contexts.
6/4/50	Field trips to visit hospital OPD to understand the nature
	of critical care

	4. Psychological First Aid for Red Cross and Red Crescent Societies was
Course	developed by the IFRC Reference Centre for Psychosocial Support
Course	At the end of the course, the students will be able to:
Outcomes	1. Develop the basic skills involved in psychological inquiry protocol;

- 2. Understand the fundamentals of psychological first aid and its role in providing immediate support to individuals experiencing trauma or crisis and
- 3. Develop skills in dealing with different crises

Course code : PSY-202

Title of the Course : SOCIAL INFLUENCE AND GROUP PROCESSES
Number of Credits : 3T + 1P

Number of Credits : 3T + 1P Effective from AY : 2024-25

Effective from AY	: 2024-25		
Pre-requisites	The student should have completed the basic psychology courses and the		
for the course	regular BA degree requirements.		
Course Objectives:	 Understand the various aspects of social influence. Identify the many facets of groups, individuals and environmen Assess the motives underlying prosocial behaviour and eval causes of aggression. 		
	Tawi do	No. of Hours	
Content:	 CHAPTER I: SOCIAL INFLUENCE Conformity: Social pressure, Research on conformity, How social norms emerge? and Social foundations of conformity (Normative social influence and Informational social influence). Factors affecting conformity: Cohesiveness and conformity, Conformity and group size, Conformity and status within a group and Descriptive and injunctive social norms. Reasons for nonconformity: Actor observer effect revisited, Power as a shield against conformity, The desire to be unique and nonconformity and the benefits of nonconformity. Minority influence. Compliance: Underlying principles of compliance and Tactics of compliance Obedience: Milgram's study, why destructive obedience 		
	occurs and Resisting effects of destructive obedience CHAPTER II: GROUPS, INDIVIDUALS AND ENVIRONMENT 1. Groups: Types, components, benefits and costs: Social facilitation, Social loafing, Techniques for reducing social loafing and Deindividuation. 2. Group decisions: Group-think and Group polarization. 3. Social psychology and sustainable future: Conveying and changing social norms, Keeping track of consumption, Introducing competitiveness, Inducing hypocrisy and Removing small barriers to achieve big changes. CHAPTER III: PROSOCIAL BEHAVIOUR	11	
	 Motives underlying prosocial behaviour: Evolutionary perspective, Social exchange and Empathy and altruism. 	11	

	2 2 1 100	
	2. Personal qualities and prosocial behaviour: Individual	
	differences, Gender differences, Cultural differences, Religion	
	and Mood.	
	3. Situational determinants of prosocial behaviour: Environment	
	(Rural / urban), Residential mobility, Number of bystanders	
	(Bystander effect), The five steps of helping behaviour,	
	Diffusion of responsibility in cyberspace and Effects of media	
	(Video games and music lyrics).	
	4. Factors that increase helping: Similarity, Exposure to prosocial	
	models, Playing video games, Feelings that reduce our focus	
	on ourselves and Social class.	
	5. Factors that reduce helping: Social exclusion, Feelings of	
	anonymity and Economic value.	
	6. Crowdfunding: A new type of prosocial behaviour. CHAPTER IV: AGGRESSION.	
	AGGRESSION: Perspectives on aggression (Biological factors,	
	Drive theory and Modern theories of aggression).	
	2. Basic sources of aggression: Frustration and Direct	
AND	provocation.

- 5. Comprehend the purpose and types of reliability and validity estimates.

Course Code : PSY-301

Title of the Course : COUNSELING PSYCHOLOGY

Number of Credits : 04

Effective from AY : 2024-25

Effective from A	Y : 2024-25	
Pre-requisites	The student should have completed the basic psychology courses	in the
for the Course:	previous semester and the regular BA degree requirements.	
	1. Develop skills essential for professional counselors.	
Course	2. Learn the application of various therapies in counseling.	
Objectives:	3. Sensitize the students with different specialty areas in counselling	
	4. Gain insight into the contemporary trends in counselling	
	Control Day	No of
		hours
	CHAPTER I: INTRODUCTION TO COUNSELING	
	Meaning and goals of counselling	
	2. The effective counselor: Personal characteristics, Therapeutic	
	relationship: Importance, components	15
(F)	3. The facilitative conditions and counselling relationship: empathtic	
OAUNIVERS	understanding, unconditional positive regard, congruence	2
	4. Ethical issues and dilemmas in counseling	
6/4388	CHAPTER II: tactics and techniques of counselling	5/0
	1. Levels of counselling techniques: nonverbal and verbal	1/ H
SIE	behaviours: the response mode approach	15
H.M.B.	2. Cultural diversity and cross cultural counselling : definition,	87
विश्व विश्व	barriers and biases, stereotypes in treatment	3
Wedge is Un	3. Stages and process of counselling	
Content:	CHAPTER III: COUNSELING SPECIALTIES	
	1. Marriage, couple and family counselling: the family system	
	approacach Mountains	
	2. Crises Counselling: suicide, grief and sexual abuse	
	3. Deaddiction counselling: The tweleve step program	15
	4. Group counselling: advantages and limitation , therapeutic	
	factors in group work and ethical concerns (confidentiality,	
	informed consent)	
	(A field trip to a counseling centre or deaddiction facility)	
	CHAPTER IV: CONTEMPORARY TRENDS IN COUNSELING	
	Technology and Counseling Counseling diverse and the counseling account.	
	2. Counseling diverse populations: Gender-based counseling, sexual	
	orientation	15
	3. Emerging counseling therapies: Expressive Therapy (Art, music,	
	and dance), Ecotherapy (Nature-based interventions and	
	biophilia hypothesis), Animal-assisted therapy	
	4. Mindfulness-based interventions	

	·
	1 A combination of conventional teaching methods, such as lectures, and case-based learning may be employed.
Pedagogy:	2 The concepts covered in this course can be more effectively examined
	using hands-on, practical experiences and learning methods such as field
	visits, role play, simulation and group discussion.

Course Code : PSY-302

Title of the Course : ABNORMAL PSYCHOLOGY

Number of Credits : 04

Effective from AY : 2025-26

Effective from AY	: 2025-26	
Pre-requisites	The student should have completed the basic psychology courses in	
for the course	previous semester andg the regular BA degree requirements.	
Course Objectives:	 Understand the classification, and the clinical picture of various psychological disorders. Explore the historical development of abnormal psychology. Analyze the causal factors implicated in psychological disorders. Examine the importance of family and social support in the treatment of mental illness, and legal issues involving people with mental illness. 	
		No. of
	UNIVE	Hours
	CHAPTER I: AN OVERVIEW OF ABNORMAL PSYCHOLOGY	
A STATE OF THE STA	 Indicators of Abnormality, The DSM-5 and the definition of mental disorder, Classification and Diagnosis. Historical views of abnormal behaviour- Demonology, Gods 	
	and Magic, Hippocrates' early medical concepts, Views of abnormality during the Middle Ages, Establishment of early	
	asylums, Humanitarian reform.	A A
	3. The emergence of contemporary views of abnormal	15
THE PARTY OF THE P	behaviour- Biological discoveries: Establishing the link	10 N
Consularity - Do	between brain and mental disorder, Development of the psychological basis of mental disorder.	0
	4. Clinical Assessment and Diagnosis-The basic elements in	
	assessment, Physical assessment of the organism,	
Content:	Psychosocial assessment, and The integration of assessment	
Content.	data.	
	CHAPTER II: CAUSAL FACTORS AND VIEWPOINTS	
	1. Risk Factors and Causes of Abnormal Behavior-Necessary,	
	sufficient, and contributory causes, Diathesis-Stress Models.	
	2. The Biological Perspective: Genetic vulnerabilities, Brain dysfunction and neuroplasticity, Imbalance of	
	neurotransmitters and hormones, Temperament.	
	3. The Psychological Perspective: Psychodynamic perspective,	15
	Behavioural perspective, Cognitive-behavioural perspective	
	4. The Social Perspective-Early deprivation or trauma, Problems	
	in parenting styles, Marital discord and divorce, Maladaptive	
	peer relationships, Prejudice and discrimination in race,	
	Gender, and ethnicity.	
	CHAPTER III: EXPLORING NEW ADDITIONS IN DSM V:	15

	1. Trauma and stress-related disorders: Adjustment disorder,
	PTSD, and Acute stress disorder.
	2. Anxiety disorders: specific phobia, social phobia, panic
	disorder, agoraphobia, generalized anxiety disorder. Mood
	disorders: unipolar depressive disorders, bipolar and related
	disorders.
	3. Other psychological disorders: Obsessive-compulsive and
	related disorders, Body dysmorphic disorder, Hoarding
	Disorder, Trichotillomania, and Excoriation; Disruptive,
	impulse control, and Conduct disorders, Oppositional Defiant
	Disorder, Intermittent explosive disorder, Pyromania, and
	Kleptomania
	4. Gender dysphoria and Paraphilic disorders
	(All disorders will cover the clinical description and the
	criteria for diagnosis)
	Field trip to the IPHB or any other mental health Facility is
	advocated as part of their teaching-learning experience
	CHAPTER IV: CONTEMPORARY AND LEGAL ISSUES IN
OAUNIVERS	ABNORMAL PSYCHOLOGY
	Perspectives on prevention: Universal interventions, Selective
6/4388	interventions, Indicated interventions.
	2. Efforts in India towards mental health care.
	3. Other conditions that may be a focus of clinicians' attention
THE PARTY OF	(relational problems and abuse and neglect)

SEMESTER V

Name of the Programme : BA PSYCHOLOGY

Course Code : PSY-361
Title of the course : INTERNSHIP

Number of Credits : 2

Effective from AY : 2024-25

Pre-requisites	The student should have completed the basic psychology courses, in a	addition
for the Course:	to completing the regular BA degree requirements.	
Course	Gain experience and in situ hands-on understanding of a career in psy	chology
Objectives:		
		No. of
	विभाविका ।	Hours
	Internship should involve	
	I – OBSERVATION AND COMMUNITY OUTREACH	
	Observation in various field settings: NGOs, schools, private	30
	practitioner clinics, companies and industrial/ corporate	
	organizations.	
Combonto	Observation log book to be maintained.	
Content:	Help with Organizing and conducting one workshop with any of the	San .
	targetgroups (adolescents, parents, educators, employees etc.)	
67 DIREK	II – ADMINSTARTION SERVICES AT A MENTAL HELATH FACILITY	5/0
4	The student should be involved with administrative services in any of	20
0 1	the various field settings: NGOs, schools, privatepractitioner clinics,	30
The state of the s	companies and industrial/ corporate organizations.	
Pedagogy:	In situ experiential learning	1
Course Outcomes:	At the end of this course, the student will be able to:	
	1. Understand the role of a psychologist in various settings and mana	gement
	plan;	
	2. Demonstrate planning and organization skills by conducting aw	areness
	sessions on selected topics related to mental health	

Name of the Course : BA PSYCHOLOGY

Course Code : PSY-321

Title of the Course : Qualitative Data Analysis

Number of Credits : 03T + 01P Effective for AY : 2025-2026

Effective for AY	: 2025-2026	•
Pre-requisites	The student should have completed the basic psychology courses	in the
for the course	previous semester and the regular BA degree requirements.	
Course	1. Describe and explain methods of qualitative data collection	
Objectives	2. Analyse and differentiate between key approaches to qualit	ative data
	analysis	
	3. Design and implement a qualitative data analysis strategy	y within a
	research framework in research	
	Georgian + Day	
Contents	CHAPTER I: INTRODUCTION TO QUALITATIVE RESEARCH IN	No. of
	PSYCHOLOGY	hours
	Definition and Characteristics of Qualitative Research

	CHAPTER III: ANALYSING QUALITATIVE DATA:	
	1. Thematic Analysis: Defining, Conducting, Analysing,	
	Evaluating, When to Use	
	2. Grounded Theory: Defining, Conducting, Analysing,	
	Evaluating, When to Use	
	3. Discursive Psychology: Theoretical Principals, and	
	Practicalities of Research	1.5
	4. Narrative Analysis: Defining, Conducting, Analysing,	15
	Evaluating, When to Use	
	5. Conversational Analysis: Defining, Data Collection, Data	
	Analysis, Evaluation	
	6. Interpretative Phenomenological Analysis: Defining, Data	
	Collection, Data Analysis, Evaluation	
	,	
	(Practicum Component)	

1. Students to work in groups of 5-7 to design and conduct one semi-structured interview that capture participants' oral narratives. The collected narratives will then be coded and analysed thematically by the group.

Examples of topics may include:

- Childhood Memories and Identity Formation: A Narrative Analysis of Early Life Experiences as Shaping Self Concept
- ii. Parenting Across Generations: A Narrative Analysis of Changing Family Dynamics
- iii. From School to College: A Narrative Analysis of First-Year Students' Transition Experiences
- iv. Evolving Neighbourhoods and Community Identity: A Narrative Analysis of Changing Social Landscapes

Note for instructors: instructors may assign one topic per group, guide students in developing aims and research questions, semi-structured interview guide which can capture oral narratives from participants, in developing codes and themes, and writing discussion linking developed themes to at least 2-3 research in psychology; the journal entry may follow APA format of Introduction and Literature Review, Aim, Research Questions, Methodology (Sampling, Method of Data Collection and Analysis, Ethical Considerations), Results and Discussion, Conclusion

2. Students to work in groups of 5-7, design and conduct one focus group discussion with 5-8 participants each and then use thematic analysis to code and analyse data collected by the group.

Examples of topics may include:

- i. The Influence of Peer Relationships on Mental Health and Decision-Making among College Students
- ii. Online vs. Offline Friendships: Emotional Connection, Social Support, and Well-Being
- iii. Cultural Identity and Inclusion in Higher Education: Psychological Impacts and Social Belonging

Note for instructors: instructors may assign one topic per group, guide students in developing aims and research questions, a focus group discussion guide, in developing codes and themes, and writing discussion linking developed themes to at least 2-3 research in psychology; the journal entry may follow APA format of Introduction and Literature Review, Aim, Research Ouestions, Methodology (Sampling, Method of Data Collection

30 Hours

and Analysis, Ethical Considerations), Results and Discussion, Conclusion

3. Students to work in groups of 5-7, design and conduct one ethnographic observation each and then use thematic analysis to code and analyse data collected by the group.

Examples of topics may include:

- i. Gender Norms and Socialization at Home
- ii. Norms and Cultures of the Classroom

Note for instructors: instructors may assign one topic per group, guide students in developing aims and research questions, an observation checklist (deciding what to observe), and in how fieldnotes and memos are to be taken in observational studies (for example, apart from observing behaviours of other students and family members, they can asked also to write a reflective paragraph of one's own experience at home or within the classroom which can also form as data in observational studies). Furthermore, in developing codes and themes, and writing discussion linking developed themes to at least 2-3 research in psychology; the journal entry may follow APA format of Introduction and Literature Review, Aim, Research Questions, Methodology (Sampling, Method of Data Collection and Analysis, Ethical Considerations), Results and Discussion, Conclusion

Evaluation of practicum component:

- i. Journal/ file maintained with all three practicums
- ii. 2-hour exam which will assess students' ability to design a qualitative study using interviews, or FGDs, or observations.
- a. They will be provided with topics- must formulate a clear aims and research questions
- b. Justify their chosen method (for example, one on one narrative interviews would be more appropriate for capturing stories and for sensitive topics; FGDs may be more appropriate for understanding topics which also have a group dynamic; ethnographic observations when studying natural behaviours, social interactions, or non-verbal cues in real-life settings)
- c. Student also will be required to develop a narrative interview schedule, FGD, or observational guide with wellstructured questions or key focus areas.
- d. They can also write about methodology (ethical considerations, and most appropriate sampling methods) and steps required for data analysis).

Pedagogy	 A blend of traditional teaching techniques- lecturing and problem-based learning may be used in the classroom. The ideas addressed in this course can be better explored through experiential learning tools such as group discussions, role play, debates, flipped learning demonstrations and sharing of experiences, among others, during lectures.
	3. Facilitators are also encouraged to use ICT tools such as Power Point Presentations/ Ted talks/ documentary of science to facilitate engagement with syllabus topics.
References	 Howitt, D. (2019). Introduction to qualitative research methods in psychology: Putting theory into practice [4th ed.]. Pearson Willig, C., & Stainton-Rogers, W. S. (Eds.) (2017). The Sage handbook of qualitative research in psychology [2nd ed.]. SAGE Publications.
Course	At the end of the course, students will be able to:
Outcomes	1. Explain various techniques for collecting qualitative data;
	2. Understand the theory behind qualitative data analysis;
1	3. Evaluate diverse strategies employed in qualitative data analysis and
COS UNIVERSITY	4. Utilize acquired knowledge to formulate and implement qualitative research in psychology

72

Semester VI

Name of the Programme : BA PSYCHOLOGY

Course Code : PSY-304

Title of the Course : COGNITIVE PSYCHOLOGY

Number of Credits : 3+1
Effective from AY : 2024-25

Effective from AY	: 2024-25	
Pre-requisites	The student should have completed the basic psychology co	urses, in
for the course	addition to completing the regular BA degree requirements.	
Course Objectives	 To provide core knowledge of basic and higher order cognitive p To develop a general understanding of cognitive psychology as a To highlight the neuropsychological basis in cognition. To create a foundation for higher education and careers in psychology. To develop an understanding of the experiments and rescognitive psychology 	science.
	OR UNIVERS	No. of
	700	Hours
Contents	 CHAPTER I: FOUNDATIONS OF COGNITIVE PSYCHOLOGY Nature of Cognitive Psychology Evolution of Cognitive Psychology: history Research Methods in Cognitive Psychology Paradigms of Cognitive Psychology: Cognitive Neuroscience, Cognition and Artificial Intelligence CHAPTER II: LOWER ORDER COGNITIVE SKILLS Attention: Nature and Types, Theories of attention (bottleneck theories, Spotlight theories, schema theories, inattentional blindness) Perceptual Processes: Top-Down and Bottom-Up processes Imagery: Nature of Mental Imagery, Imagery and the brain, using imagery to improve memory Memory: Models of memory (Information Processing Model, Levels of Processing Model) 	15
	Levels of Processing Model, Working Memory Model), narrative and autobiographical memory, semantic memory, forgetting-nature and theories (decay, interference), memory and the brain 5. Concept formation: Nature and types of concepts, forming new concepts, concepts and the brain CHAPTER III: HIGHER ORDER COGNITIVE SKILLS 1. Language: structure, language comprehension and production, language acquisition 2. Reasoning: Deductive and Inductive Reasoning, approaches to the study of reasoning	15

At the end of this course, the learner will be able to: Define the fundamental concepts in cognitive psychology; Explain the paradigms and current trends in cognitive psychology; Apply the principles of cognitive psychology to solve real world problems; Analyse the neuropsychological correlates of cognitive processes and Demonstrate the occurrence of various cognitive processes in a

Course Code : PSY-305

Title of the Course : STATISTICS FOR PSYCHOLOGY

Number of Credits : 04 Effective from AY : 2024-25

Pre-requisites for the course: Students are expected to have fulfilled the basic psychology course requirements in preceding semesters, alongside meeting the standard criteria for obtaining a BA degree 1. Understand the various concepts of statistics and graphical representation of data. 2. Identify the uses and applications of descriptive statistics. 3. Assess the properties of the normal probability curve and hypothesis testing. 4. Evaluate the concepts of percentiles, percentile ranks, correlations, and types. CHAPTER I: UNDERSTANDING BASIC CONCEPTS 1. Descriptive Statistics and Inferential Statistics 2. Variables and Scales of Measurements (nominal, ordinal, interval and ratio) 3. Frequency Distribution 4. Graphical Representation of Data (Frequency Polygon, Histogram, Ogive, Bar graphs and Pie chart) CHAPTER II: MEASURES OF CENTRAL TENDENCY & VARIABILITY. 1. Calculations of Mean, Median and Mode 2. Properties and uses of Mean, Median and Mode 3. Calculation of standard Deviation 4. Uses and Properties of standard deviation. CHAPTER III: NORMAL PROBABILITY CURVE AND HYPOTHESIS TESTING. 1. Normal probability curve: Properties and Divergence: Skewness and Kurtosis (theoretical concepts) 2. Z scores and Calculating Z scores 3. Hypothesis Testing: Types of hypotheses (Null and alternative hypothesis), Levels of Significance, One-Tail and Two-Tail Test and Type 1 and Type Two Errors 4. Testing Significance of Difference Between Two Means and calculations of student t test (paired and independent samples t test) CHAPTER IV: PERCENTILE AND CORRELATION.	Effective from AY	: 2024-25

	5. Results and Discussion: Presentation of findings and
	interpretation of results.
	7. Conclusion: Summary of key findings, limitations, suggestions
	for future research and implications.
	8. References: Alphabetical list of all sources (APA format) cited in
	the report/study.
	9. Appendices: Measures and/or additional materials.
	*To ensure uniformity in the reports it was decided to follow the
	following pattern for presentation :
	The main body of the project report should be divided
	into 3 chapters:
	1 st chapter: Introduction and literature review; (30% weightage)
	2 nd chapter: Research methodology and results and discussion(
	60% weightage)
	3 rd chapter : Conclusion(10 %)
	This main body should be a minimum of 30 pages and
	not exceeding 60
0-0	(students should be encouraged to either read their findings at
/VOPUNIVER	seminars, and conferences or get them published)
STORAGE	1. Problem Formulation: The project guide will assist students in
0 600	formulating a clear and focused research question or statement that aligns with their interests and contributes to the existing knowledge in
0 46	psychology.
	Research Methodology Training: The project guide will ensure students
Pedagogy:	understand various research designs, and ethical considerations
(Ordination of Disco)	relevant to their chosen topics.
	3. Effective Communication: The project guide will assist and guide
	students to articulate their ideas clearly in the final project including
	writing using APA style.
Deference/	American Psychological Association. (2020). Publication manual of the
References/ Readings	American Psychological Association (7th ed.). Washington, DC: American
Readings	Psychological Association. (Or the latest APA manual)
	Upon successful completion of this course, students will be able to:
	1. Demonstrate research competence through conducting a thorough
	literature review, designing and implementing a research project;
Course	2. Apply knowledge through analyzing and interpreting data using
Outcomes:	appropriate qualitative, quantitative or mixed techniques;
	3. Effectively communicate research findings utilizing APA style for
	formatting and citation and
	4. Recognize ethical considerations in psychological research.
