

#### **Goa University**

## P. O. Goa University, Taleigao Plateau, Goa - 403 206, India Syllabus of M.Sc. (Applied Geology) Program at Earth Science Department (Effective from Academic year 2018-19 onwards)

The Department of Earth Science offers a versatile Master of Science (MSc) program in Applied Geology that prepares its students for many professional opportunities in industry, research and education through an interdisciplinary approach, the syllabus of which is so designed to train the students to face all the competitive/professional exams like GATE, NET, and UPSC exams.

## Academic focus and purpose of Studying Geology:

- Geology is the science of the origin, composition and evolution of the Earth over 4.5 billion years, and the processes that change the Earth and form the foundation for our existence.
- Through the Master of Science (MSc) programme, you will specialise in the area of geology which you find most interesting. Depending on your interests, you can focus your career in various directions which include:
  - ✓ Solving selected day-to-day basic problems in the geological sciences with the world as your playing field; exploration and exploitation oil and gas, minerals and natural raw materials; groundwater exploration and exploitation, water supply, pollution prevention.
  - ✓ The origins, evolution and future of life; climate change; Research in natural and industrial materials and their technological application

## Prerequisites:

 Bachelor's Degree in Geology of Goa University or equivalent Bachelor's degree in Geology from any other recognized universities in India and Abroad. For more details one can visit the university website <a href="http://www.unigoa.ac.in.or">http://www.unigoa.ac.in.or</a> refer the Handbook of Admission at Goa University.

## Program structure and what you will be studying:

• The Program runs over two years with 4 Semesters. The Program has compulsory/Core Courses and optional courses each representing either 1/2/3/4/5/6 credits and covers most of the Geoscience disciplines (both in Theory and practical).

## Credits (theory, tutorials and practical):

The Program follows the Choice Based Credit System (CBCS) and in each semester students have to opt for the theory and practical courses in Geology in addition to the other chosen subjects.

- Minimum 64 Credits spread over 4 semesters are required to be obtained (32 credits for Compulsory Core
  courses and 16 Credits in optional courses offered by the parent department and the remaining 16 credits
  can be obtained/earned from any other departments/universities).
- Detailed list of Courses with Credit weightage are given in the following Tables.

## **Project Work/Dissertation**:

Dissertation work is an optional 8 credit course (to be offered and started from end of 1<sup>st</sup> year).

#### Geological Field Mapping/Industrial Training:

• Geological field mapping & field training forms an integral part of the program, provides students an opportunity to interact and learn from scientists/professionals from research & academic institutes.

#### **Career Opportunities:**

- As the program is tailored to suit both academic & industry career progression, the MSc in Applied Geology
  gives a world of opportunities for employment government with many interesting and different socially
  relevant assignments in India and abroad.
- The program is also widely recognized by a broad range of employers in the geology, mining and environment related govt/private sectors apart from admission to the Ph.D programs.
- Majority of our alumni are working in Oil and Mineral Industry in India and Abroad.

Note: Please refer the following tables for complete list of the courses and the detailed contents.

## List of Courses offered in 2 year M. Sc. (Applied Geology) Program

**Compulsory Courses (32 Credits)** 

Compulsory Courses (Theory/Practical)	L-T-P	Credits
GLC-101: Principles of Mineralogy and Geochemistry	3-0-0	3
GLC-102: Structural Geology and Geotectonics	3-0-0	3
GLC-103: Igneous Petrology	3-0-0	3
GLC-104: Metamorphic Petrology	3-0-0	3
GLC-105: Sedimentology	3-0-0	3
GLC-107: Economic Geology	3-0-0	3
GLC-108: Principles of Stratigraphy and Indian Geology	3-0-0	3
GLC-121: Geological Field Mapping	0-0-2	2
GLC-122: Geological Field Training	0-0-2	2
GLC-124: Practical of GLC-101 (Mineralogy & geochemistry)	0-0-1	1
GLC-125: Practical of GLC-102 (Structural Geology)	0-0-1	1
GLC-126: Practical of GLC-103 (Igneous Petrology)	0-0-1	1
GLC-127: Practical of GLC-104 (Metamorphic Petrology)	0-0-1	1
GLC-128: Practical of GLC-105 (Sedimentology)	0-0-1	1
GLC-130: Practical of GLC-107 (Economic Geology)	0-0-1	1
GLC-131: Practical of GLC-108 (Stratigraphy & Indian Geology)	0-0-1	1

L-T-P: Lecture-Tutorial-Practical hours

## Syllabus of the M. Sc. Geology Curriculum

(from Academic year 2018-19 onwards)

#### **GLC-101: Principles of Mineralogy and Geochemistry**

3-0-0 = 3 Credits

Introduction and scope of geochemistry, types, geochemical classification of elements, composition of the crust, mantle and the core, distribution and behaviour of major and trace elements in igneous, sedimentary and metamorphic processes and products, introduction to stable isotope geochemistry. Introduction to crystal chemistry: ionic radii and co-ordination. Composition, structure, Chemistry and paragenesis of the mineral groups:- Olivine, Pyroxene, Amphibole, Mica, Feldspar, Garnet.

Optical mineralogy: Introduction to optical properties of minerals - colour, pleochroism, relief, birefringence, extinction and interference colour. Study of isotropic and anisotropic minerals under convergent light.

#### List of Books:

- 1. Deer, Howie and Zussman: Introduction to rock forming minerals, and rock forming minerals Vol I and II
- 2. Klein and Hurlbut: Dana's mineralogy
- 3. Winchell: Optical mineralogy
- 4. Nesse: Introduction to Optical Mineralogy
- 5. Kerr, Paul: Optical mineralogy
- 6. Mason and Moore Introduction to geochemistry
- 7. Krauskopf: Introduction to geochemistry
- 8. Walther, J. V: Essentials of geochemistry Henderson: Inorganic geochemistry

## **GLC-102: Structural Geology and Geotectonics**

3-0-0 = 3 Credits

Rock mechanics: Stress and Strain. Behaviour of crustal rocks. Microstructures and deformation mechanics. Fractures and faults: fracture analysis, fracture mechanics, joints in Plutons. Fault mechanics: role of fluids, movement mechanisms, brittle versus ductile faults, shear sense indicators, shear zone Kinematics. Fold: Mechanism of folding and accompanying phenomena, deformation mechanism and strain, Ramsay's classification of folds, lineations and fold mechanism, occurrence and recognition, cleavage and foliations. Linear structures: lineation as shear sense indicators, interpretation of linear structures. Structural analysis: procedures, mesoscopic analysis, symmetry of fabrics. Fundamentals concepts of Geotectonics and Isostasy. Sea floor spreading; Continental drift and plate tectonics. Volcanic and seismic belts of the Earth. Thermal history of the earth. Major tectonic features of the Earth: shield areas, mobile belts, rift valleys, mid-ocean ridges, submarine canyons.

## List of Books

- 1. Hatcher, R. D. Structural Geology: Principles, concepts and problems. Merrill Publi.Co.
- 2. Condie, K. C. Plate Tectonics and Crustal Evolution. Pergamon Press
- 3. Windley, B. The Evolving Continents. John Wiley & Sons
- 4. Twiss, R. Structural Geology. New York: W. H. Freeman and Company
- 5. Hobbs, B.E., Means, W.D. & Williams, P.F. An Outline of Structural Geology, John Wiley
- 6. Park, R. Foundations of Structural Geology. Blackie and Sons Limited
- 7. Ramsay, J. Folding and Fracturing of Rocks. McGraw-Hill
- 8. Moores, E. Tectonics. W. H. Freeman & Co.
- 9. Ben A. Van Der Pluijm cand Stephen Marshak: Earth Structure Published by W W Norton
- 10. Stephen Marshak and Gautam Mitra: Basic methods of Structural Geology Prentice Hall
- 11. Fossen, H: Structural Geology. Cambridge University Press.

#### **GLC-103: Igneous Petrology**

3-0-0 = 3 Credits

Introduction to Magmas and Magmatic Processes; Process of formation and description of Textures and Structures of volcanic and plutonic rocks; Classification of igneous rocks: modal, chemical-, quasi-chemical-schemes: their merits and demerits; Magma generation: Heat source and the factors responsible to bring about melting, Fractional melting, Batch melting and Zone melting; Magmatic Evolution; Magmatic differentiation:

crystal fractionation, gravitational differentiation, flowage differentiation, filter pressing, liquid immiscibility; Magmatic assimilation, Magma Mixing and contamination; Composition of the mantle; Enriched- and Depleted-mantle and their characteristics; Binary and ternary systems; Magma Associations in relation to Plate Tectonics.

Continental Layered Intrusions: Mineralogical and Petrological characteristics with special reference to the Bushveld-, Skaergaard-, Stillwater-Complexes; Basaltic associations: continental flood basalts such as the Deccan Traps; Mid Ocean Ridge Basalts, Ocean Island basalts, Continental as well as ocean Arc magmatism; Alpine type intrusions and Ophiolites; Alkaline rocks- Nephelinites and Ijolites, Lamprophyres & Lamproites, Carbonatites & Kimberlites; Granites and Granitic rocks, I-type, S-type, A-type and M-type granites, anatexis and Granitization; Anorthosites.

#### List of Books:

- 1. Barker: Igneous Rocks
- 2. Best and Christainsen: Igneous Petrology Daly: Petrology of Igneous Rocks
- 3. Bowen and Tertle: Carbonatites
- 4. Rock, N.M.S.: Lamprophyres
- 5. Dawson: Kimberlites
- 6. Willey, P.J.: Ultramafic and Related Rocks Hall, A.: Igneous Petrology
- 7. Wilson, M. J.: Igneous Petrology
- 8. William, Turner and Gilber: Petrography
- 9. Moorhouse, W.W.: The Study of Rocks in Thin Sections
- 10. Wager and Brown: Layered Igneous Rocks

## **GLC-104: Metamorphic Petrology**

3-0-0 = 3 Credits

Introduction, Categories of metamorphism, general characteristics of contact and regional dynamothermal metamorphic terrains, zones and facies of metamorphism, isograds and isoreactiongrads, classification of metamorphic rocks, factors of metamorphism, mineralogical phase rule and the concept of equilibrium in metamorphic systems, facies and grade concept, facies of contact and regional dynamothermal metamorphism, progressive reactions in metamorphism of limestones, shales and mafic rocks, metamorphism in the context of plate tectonics.

#### List of Books

- 1. Best: Igneous and metamorphic petrology
- 2. Winkler: Metamorphic petrogenesis
- 3. Turner: Metamorphic rocks
- 4. Bucher K, Grapes R: Petrogenesis of Metamorphic rocks
- 5. Philpotts A, Ague J. J.: Principles of Igneous and Metamorphic Petrology
- 6. Winter J.: Principles of Igneous and Metamorphic Petrology
- 7. Ehlers, Ernest: Petrology: Igneous, Sedimentary and Metamorphic

#### **GLC-105: Sedimentology**

3-0-0 = 3 Credits

Introduction to Sedimentology; Sedimentary processes (Weathering, Transportation & Deposition); Textures and structures of sedimentary rocks; Petrography and classification of the- terrigenous/ clastic (conglomerates, sandstones and mud rocks), carbonate rocks (limestones and dolomites) and other non-clastic (evaporitic carbonaceous, silicious, phosphatic, iron & manganese-rich) sedimentary rocks; Provenance; Introduction and classification of sedimentary environments and environmental analysis & interpretation.

## List of Books:

- 1. Pettijohn, F. J. Sedimentary Rocks.
- 2. Collinson, J. & Thompson, D., Sedimentary Structures, Terra Publ, 3rd Ed, 2006.
- 3. Nicholls, G. Sedimentology and Stratigraphy. Wiley-Blackwell, 1999.
- 4. Prothero, D.R. and Schwab, F. Sedimentary Geology: An Introduction to Sedimentary Rocks and Stratigraphy, 2nd Edn., W.H. Freeman, 2003.
- 5. Selley, R.C., Applied sedimentology, 2nd Edn., Academic Press, 2000.

- 6. Tucker, M.E. Sedimentary Petrology, 3rd Edn., Blackwell Science, 2001.
- 7. Sam Boggs Jr., Principles of Sedimentology & stratigraphy, 4th Ed, PEARSON publ, 2006
- 8. Sam Boggs Jr., Petrologyof Sedimentary Rocks, 2nd Ed. Cambridge Univ press, 2009
- 9. Greensmith, J. T. Petrology of the Sedimentary Rocks, 7th Ed., UNWIN HYMAN
- 10. Lindholm, R. C. A Practical Approach to Sedimentology, ALLEN & UNWIN, 1987.

#### **GLC-107: Economic Geology**

3-0-0 = 3 Credits

Introduction: scope of economic geology Mineral economics. Ore, tenor, gangue, resource, reserves Texture and structures of ore deposits Classification of ore deposits. Ore bearing fluids: type, nature, chemistry Physico-chemical controls of ore deposition Wall-rock alteration. Controls of ore localization. Distribution of ore deposits in relation to plate tectonic settings. Ore Deposits of India (Banded Iron Formations; Iron ore deposits; Manganese ore deposits; Polymetallic ore deposits: copper, lead, zinc; Chromite deposits; Laterite and Bauxite deposits: distribution in India and genesis; Asbestos deposits of India; Barite deposits; Gold in India; Diamond deposits.

## List of Books

- 1. Gilbert and Parks: Geology of Ore Deposits
- 2. Parks and McDiarmid: Ore Deposits
- 3. Bateman, A. M.: Economic Mineral Deposits
- 4. Hutchson: Economic Mineral Deposits
- 5. Atkinson: Economic Ore Deposits
- 6. Smirnov: Economic Ore Deposits
- 7. Jensen, M. L. and Bateman, A. M.,: Economic Mineral Deposits
- 8. Brown and Dey: The minerals and nuclear fuels of the Indian Subcontinent
- 9. Burma Roy, B.C., : Indian Mineral Resources: Industries and Economics
- 10. Deb: Industrial Minerals and Rocks of India
- 11. Gokhale and Rao: Ore Deposits of India
- 12. Wadia, D. N.,:Mineral wealth of India
- 13. Krishnaswami: India's Mineral Resources
- 14. Arndt N. & Ganino C.: Metals & Society. Springer.
- 15. Taylor R.: Ore Textures. Springer.

## GLC-108: Principles and Stratigraphy and Indian Geology

3-0-0 = 3 Credits

Introduction. Stratigraphic principles. Evolution of Stratigraphic column. Stratigraphic (Lithostratigrapic, Chronostratigraphic and Biostratigraphic) nomenclature. Correlation. Stratigraphy of India: Precambrian, Proterozoic, Palaeozoic, Mesozoic and Cenozoic stratigraphic successions. Gondwana stratigraphy. Quaternary stratigraphy.

#### List of Books:

- 1. Naqvi, S.M. and Rogers, J.J.W.- Precambrian Geology of India, Oxford University Press.
- 2. Ramakrishnan, M. and Vaidyanadhan, R. Geology of India vol. 1 & 2. Geol. Soc. India.
- 3. Krumbein, W. Stratigraphy and Sedimentation. W. H. Freeman and Company
- 4. Prothero, D. Sedimentary Geology: An introduction to sedimentary rocks and stratigraphy. Freeman & Co.
- 5. Boggs, S. Principles of sedimentology and stratigraphy. Pearson Prentice Hall
- 6. Ravindra, K. Fundamentals of Historical Geology and Stratigraphy of India. New Age International Limited, Publishers.

#### **GLC-121: Geological Field Mapping**

0-0-2 = 2 Credits

The student will be taught the techniques of geological mapping, field data collection: recordingthe attitude of beds, foliation, lineation, joints and their analysis. Sampling of rocks, preparation of geological field report. The record of data will be maintained in a field-diary. This work willbe carried out under the supervision of teachers who will accompany the students during the course of the field-traverse. There will be a viva-voce examination based on the field report.

## **GLC-122:** Geological Field Training

0-0-2 = 2 Credits

Visit to important mines/mineral deposits; Visit to Industry/Professional Organizations/National Institutes which may include short term in-house training at respective labs. The training program will be carried out under the supervision of teachers. Students are expected to learn the techniques and methodologies applied on site in the professional organizations and also to gain knowledge related to instrumentation. Students are expected to write a detailed report on their visit. There will be a viva-voce examination based on the field report.

## GLC-124: Practical of GLC-101 (Mineralogy and Geochemistry)

0-0-1 = 1 Credit

Observing and recording properties of representative minerals in hand specimens.

Observation and recording of optical properties of major rock forming minerals.

Study of anisotropic uniaxial and biaxial minerals in convergent light and determination of the optic sign of the mineral with the aid of suitable accessory plates.

## GLC-125: Practical of GLC-102(Structural Geology& Geotectonics)

0-0-1 = 1 Credit

Completion of outcrops. Preparation and interpretation of geological maps and sections; Structural problems concerning economic deposits; Recording and plotting of the field data; Study of deformed structures in hand specimens; Strain estimation from the data already collected from the field.

## GLC-126: Practical of GLC-103 (Igneous Petrology)

0-0-1=1 credit

Study of the textures and structures and identification of rocks in hand specimens. Characterisation of the following suites of rocks from micro-sections: ultramafic rocks, mafic igneous rocks, intermediate rocks, granitic rocks and alkaline igneous rocks. CIPW normative calculations of minerals based on available compositional data. Applications of trace elements in igneous petrology, such as spidergrams, REE distribution patterns and implications in deducing origin, source and evolution of magma, and inferencing from trace element ratio plots.

## GLC-127: Practical of GLC-104 (Metamorphic Petrology)

0-0-1=1 credit

Description of fabric of common metamorphic rocks in hand specimen and thin section. Description, identification and classification of commonly occurring metamorphic rocks in hand specimen and thin section.

## GLC-128: Practical of GLC-105 (Sedimentology)

0-0-1=1 credit

Granulometric analysis, presentation and interpretation of textural data; Palaeocurrent analysis; Megascopic and thin section petrographic study for observation of Texture, composition and diagenetic changes.

## GLC-130: Practical of GLC-107 (Economic Geology)

0-0-1=1 credit

Study of representative ores, and industrial minerals in hand specimens. Preparation of charts showing the distribution of ore minerals in India. Mineralogical and textural studies of common ore minerals in incident light.

## GLC-131: Practical of GLC-108 (Prin Stratigraphy & Ind. Geol) 0-0-1=1 credit

Study of rocks in hand specimens from known Indian stratigraphic horizons and type localities; Exercises on stratigraphic classification and correlation. Preparation of stratigraphic range charts.

## **Optional Courses**

## **GLO-201:** Groundwater Geology

3-0-0 = 3 credits

Introduction: Genetic classification of water, global distribution of water. Hydrologic cycle: precipitation, runoff, infiltration and evapotranspiration. Historical developments in science of hydrogeology. Vertical distribution of sub surface water, classification of aquifers and confining layers, hydraulic properties of aquifers, water table fluctuations. Concepts of

drainage and groundwater basins. Water table and piezometric surface.

Well Hydraulics and well designs: Theory of groundwater flow, Darcy's law, its validity and applications, determination of permeability in laboratory and in field. Types of wells, drilling methods, construction, design, development and maintenance of wells. Specific capacity and its determination Steady and unsteady and radial flow conditions. Pumping tests-methods, data analysis and interpretations. Seawater intrusion. Groundwater Chemistry: Groundwater quality- physical, chemical, biological properties of water quality criteria for different uses, graphical presentation of water quality data, problems of arsenic and fluoride in India Saline water intrusion in coastal aquifers and its prevention. Groundwater contamination.

Groundwater occurrence and exploration: Classification of rocks with respect to their water bearing characteristics, groundwater provinces of India. Groundwater exploration techniques. List of Books

- 1. Todd D.K.: Groundwater hydrology, John Wiley, NY, 1980
- 2. Raghunath, H.M.: Ground Water, New Age International Publishers, 2007
- 3. Fetter, C.W.: Applied hydrogeology, NY, Macmillon, 1994
- 1. 4. Davis and De Wiest: Hydrogeology

## **GLO-202: Petroleum Geology**

3-0-0 = 3 credits

Introduction to petroleum. Physical properties and chemical composition of petroleum. Origin of Petroleum. Petroleum Traps and Reservoir rocks. Primary and secondary migration and Accumulation. Petroleum exploration. Petroliferous basins of India. Oil belts of the world.

- 1. Selley, R.C., Elements of Petroleum Geology: W.H. Freeman & Co, New York. 2003
- 2. Tissot, B.P., and Welte, D.H. Petroleum Formation and Occurrence A New Approach to Oil and Gas Exploration: Springer -Verlag, Berlin. 1978
- 3. Levorsen, A.I. Geology of Petroleum: W.H. Freeman and Company. 1967
- 4. North, F.K., Petroleum Geology: Allen & UnWin, 607p. 1986

## **GLO-203: Exploration Geophysics**

3-0-0 = 3 credits

Introduction to exploration geophysics: Electrical methods: instrumentation, field procedure and interpretation using electrical methods. Electrical profiling and sounding using Wenner and Schlumberger configurations. Principles and fundamental procedures of data collection and interpretation. Seismic Methods: Principles, instrumentation, survey procedures and interpretation using seismic methods. Correction applied to seismic data.

Geophysical well logging: Introduction well logging methods, porosity logs, well log interpretation. Gravity and magnetic methods: Principles-field methods-gravimeters-corrections, interpretation of gravity data. Principles, instrumentation, field procedures and interpretation of magnetic data.

#### List of Books

- 1. William Lowrie. Fundamentals of geophysics, Cambridge university press, 1997
- 2. Kearey and Brook. An introduction to exploration geophysics, Blackwell Sc. publ, 1984
- 3. Sharma PV. Geophysical methods in geology, Elsevier, 1986
- 4. Dobrin M.B. An introduction to geophysical prospecting, McGraw Hill New Delhi, 1984
- 5. Ramachandra Rao, M.B. Outline of geophysical prospecting, Wesley press, 1975.

## GLO-204: Micropalaeontology

3-0-0 = 3 Credits

Surface and sub-surface sampling methods, sample processing techniques; morphology, classification and evolution of foraminifera. Study of selected benthic and planktonic foraminifera. Morphology and geological distribution of ostracoda, calcareous nannofossils, radiolaria, conodonts. Applications of microfossils in biostratigraphy, palaeoenvironmental interpretation and sequence stratigraphy. Deep sea record and stable isotopes studies of calcareous microfossils. Role of micropalaeontology in hydrocarbon exploration.

#### List of Books

- 1. Haynes, J.R. Foraminifera. John Wiley and Sons, 1981.
- 2. Armstrong, H.A. and Brasier, M.D. Microfossils, II Edition, Blackwell Publishing, 2005.
- 3. Haq, B.U. and Boersma, A. (Eds) Introduction to Marine Micropaleontology. Elsevier, 1978.
- 4. Murray, J.W. Ecology and Palaeoecology of Benthic Foraminifera. Longman, 1991.

## **GLO-205: Environmental Geology**

3-0-0 = 3 credits

Scope of environmental geology, ecosystem, lithosphere, hydrosphere, cryosphere and Atmosphere. Natural and man-made hazards. Mass movements, landslides, rock falls, subsidence and causes.

Volcanic and seismic hazards and mitigation measures. Dams and reservoirs-silting, Deforestation, seismicity, water logging and related hazards. Floods and droughts and their mitigations.

Groundwater pollution and management-case studies related to fluoride, pesticide, fertilizers and arsenic contaminations in India. Sea level changes, causative factors and related coastal hazards. Geological and hydrogeological aspects of waste disposal, site selection for solid waste disposal-sanitary landfills. Pollution from waste disposal sites. Conservation and protection of natural resources with special reference to water. EIA legislative measures in India.

## List of Books

- 1. Keller, E.A. Environmental Geology, Columbus, 1985
- 2. Coates, D.R. Environmental Geology, John Wiley, 1981
- 3. Soliman, M.M. et al, Environmental Hydrogeology, Lewis Publi., 1997
- 4. Valdiya, K.S. Environmental Geology-Indian context
- 5. Tank, Environmental Geology
- 6. Straler and Stralher, Environmental Geology

## **GLO-206: Remote Sensing**

3-0-0 = 3 Credits

Introduction and History of Remote Sensing; Basics of remote sensing: Electromagnetic Radiation (EMR): Resolution; Electomagnetic Spectrum: Optical/Microwave - Visible region - Radiation Sources: active & passive; Radiation quantities -Radiant energy, radiation flux, irradiation, radiance. Interaction of EMR with atmosphere and Earth's features: particulate scattering & absorption; Rayleigh's & Mie's theories; Atmospheric Windows. Spectral signature concepts - Spectral reflectance; spectral reflective characteristic of water, vegetation, soil, minerals/rocks; Factors affecting spectral reflectance of materials. Platforms and Sensors: Airborne platforms and Spacebome platforms - Sun synchronous and Geostationary satellites - Platform & sensor characteristics, Thermal detectors - Thermal infrared scanners; RADAR - SAR -interferometry; Introduction to Hyperspectral Remote Sensing. Applications of remote sensing in Geology, ground water & natural resource management.

#### List of Books

- 1. Sabins, F. F. Remote Sensing Principles and Interpretation 35th Ed. W.H. Freeman, 1997
- Jensen, J. Introductory Digital Image Processing- Remote Sensing Perspective. 2 Ed. Prentice Hall. 2003
- 3. Rees, W. G.: Physical Principals of remote sensing, 3<sup>rd</sup> Ed., Cambridge Univ. Press, 2013
- 4. Lillesand, TM, Kiefer, RW and and Chipman, JW. Remote sensing and Image Interpretation. John Wiley& sons, 5<sup>th</sup> Ed, 2003.
- 5. Ravi P. Gupta: Remote Sensing Geology. 3Ed., Springer-Verlag, 2003.

## **GLO-207: Marine Geology**

3-0-0 = 3 Credits

Introduction and scope of marine geology, morphologic and tectonic domain of the ocean floor. Oceanic profile, oceanic features, origin of oceanic crust, ocean sediments, classification, ocean tectonics, Law of the seas, EEZ. Classification of marine mineral deposits, origin and depositional system of marine resources. Beach placers, shelf deposits,

deep ocean phosphatic, polymetallic nodules, sulphate deposits, hydrocarbon deposits. Concept and causes of sea level changes and measurements. Physical and chemical properties of seawater. Residence times. Seismic stratigraphy, sequence stratigraphy. Coastal erosion and protection measures.

## List of Books

- 1. Shepard, Submarine geology
- 2. Kuenen, P. Marine geology
- 3. King, Introduction to marine geology and geomorphology
- 4. Keen, Introduction to marine geology
- 5. James Kennet, Marine geology, 1982, prentice hall
- 6. Riley and Chester, Introduction to marine chemistry
- 7. James Drever, The geochemistry of natural waters.

#### **GLO-208: GIS Fundamentals**

3-0-0 = 3 Credits

Introduction; Coordinate Systems: GCS, Map projections, Projected coordinate systems; Data Models: Vector and Raster Data Models; Geodatabase; GIS Data Input; Geometric Transformations; Spatial data Editing; Attribute Data Input and Data Base Management; Data Display & Cartography; Data Exploration; Spatial Analyses: Vector Data Analysis; Raster data Analysis; Terrain mapping and Analysis; Spatial Interpolation; Network and path analysis/applications; GIS Models & Modeling. GIS software and hardware - Review of GIS software packages

## List of Books

- 1. Longley, Geographic Information Systems and Science, 2nd Ed. WILEY, 2003
- 2. Burrough, P.A. An Introduction to GIS, 1996
- 3. Chang, K. Introduction to Geographic Information Sc., McGraw Hill, 2002.

## **GLO-209: Mining Geology**

3-0-0 = 3 Credits

Introduction to mining geology and exploration methods. Role of geologists in mining. Mining methods for metal and coal mining. Outlines of surface methods of mining. Underground mining. Shaft sinking and development of mine. Stopping methods. Principles of sampling and sampling methods. Core drilling (wet and dry). Type of core bits. Casing and their applications. Classification and estimation of ore reserves. Mine ventilation, mine gases and mine diseases. Slope stability in open cast mines, dewatering techniques in open cast and underground mines. Environment management. Pollution aspects, impact of mining on environment. Mine evaluation, mineral economics, mineral beneficiation techniques, mining laws, National mineral policy Mineral taxation and mine leasing. Conservation and substitution

## List of Books

- 1. R. N. P. Arogyaswamy: Course in Mining Geology. Oxford & IBH Publishers
- 2. H. E. Mckinstry: Mining Geology. Asia Publishing House
- 3. G. J. Youn: Elements of Mining Geology. McGraw Hill
- 4. Sinha and Sharma: Mineral Economics. Oxford & IBH Publishers
- 5. Taggart: Mineral Ore Dressing.

## **GLO-210: Coal Geology**

3-0-0 = 3 credits

Characteristics: Coal as rock-types of coal-mode of occurrence -structure in coal seams-coals through ages-physical and chemical characteristics of coal-macropetrographics-microlithotypes; Genetics and exploration: Origin-classification of coal-Indian coal grading-exploration of coal-Modern techniques-drilling and logging-assessment of coal reserves-calculation of coal reserves; Preparation and utilization: Coal preparation- cleaning-sizing-washing-supporting operations-beneficiation of Indian coals- coal utilization- combustion-carbonisation-gasification-hydrogenation;

Resources and Environments: Resources-Production and consumption pattern-Energy policy, conservation-environment pollution-reduce environmental hazards-mining hazards

in India-world coal resources-principal Indian Coal Fields: Occurrences-geological and geographical distribution-Gondwana coalfields-Tertiary coalfields-lignite deposits of India List of Books

- 1. Chandra, D., Singh, R.M. & Singh, M.P. Text book of coal (Indian context). Tara book agency, 2000
- 2. Stach, E. Mackowsky, M. Th., Teichmuller, M., Taylor, G.H., Chandra, D. and Teichmuller, R. Stach's. Text book of coal petrology, Gebnudar Borntraeger, Stuttgart, 1982
- 3. Wilfrid Francis. Coal its formation and composition. Edward Arnold (publ) Ltd, London 1961
- 4. Van Kreuelen, Coal-Typology-Chemistry-Physics constitution, Elsievier publ. company, 1961.

#### **GLO-211: Soil Science**

3-0-0 = 3 Credits

Introduction: Nature and importance of soil, soil formation, soil survey, physical, chemical and biological characters of soil. Relationship between soil, plants and animal; Soil types: Soil types and classification, soil genesis, mineralogy and geochemistry of soil types: laterites, bauxites, ardisols, vertisols, camborthids. Application of soil micromorphology and landscape evolution. Radiometric age determination of soils; Soil and crop production: Elements essential for plants and animals, soil nutrients, nitrogen, phosphrous, potassium, calcium, magnesium, and sulphur in soil and their significance in plant growth, micronutrients; Soil quality and landscape: Soil and water relation, organic matter insoil, functions of organic matter, organic matter and soil structure, organic matter and essential elements, tillage, cropping systems and fertility and case studies. Soil management and conservation: Introduction, irrigation, drainage, soil management for field crops, gardens, lawns, pastures, rangelands and forests. Conservation factors and implementation methods.

#### List of Books

- 1. Nyle C. Brady, Ray R. Weil, The nature and properties od soils. (13<sup>th</sup> ed) Prentice Hall, 2002.
- 2. Donald L. Sparks, Environmental soil chemistry, 2002.
- 3. Raymond B. Daniels, Richard D. Hammer. Soil geomorphology, John Wiley & Sons, 2000.
- 4. Summer, M.E. Hand book of soil science. 1992
- 5. Donald Sparks, Donald L. Sparks D, Environmental geochemistry, Academic press, 2002.

#### **GLO-212: Microtectonics**

3-0-0= 3 Credits

Introduction to microtectonics; Introduction to flow and deformation, and manifestation in rocks; Rheology; Mechanisms of deformation; Foliation, lineation and lattice preferred orientation; Shear zones; Porphyroblasts, porphyroclasts and reaction rims; Veins, strain shadows, fringes and boudins; Primary structures in rocks

## List of Books

- 1. Ague. Petrography of igneous and metamorphic rocks
- 2. Komprobst. Metamorphic rocks and their geodynamic significance
- 3. Passchier & Trou. MIcrotectonics
- 4. Passchier, Trou and Miersma. Atlas of mylonites.
- 5. Vernon and Clarke. Metamorphic petrology
- 6. Vernon. A practical guide to rock microstructures...

## **GLO-213: Planetary Geology**

2-0-0 = 2 Credits

Internal Structure of Earth and Other Planets; Volcanism; Surface Processes; Atmospheres; Basic Celestial Mechanics; General Features of Asteroids, Comets and Meteorites.

## List of Books:

1. An Introduction to the Solar System", 2004, by Neil McBride and Lain Gilmour, The Open University and Cambridge University Press.

## **GLO-214: Sedimentary Basin Analysis**

3-0-0= 3 Credits

Basin classification and their characteristics; tectonic framework of basins and their architecture; economic significance of basin analysis; facies concept, process-response

models and interpretation of sedimentary environments; carbonate and clastic facies models; seismic facies and stratigraphy; well-log facies application in sequence stratigraphy; sequence stratigraphy; stratigraphic correlation; basin mapping - structure and isopach contouring, lithofacies and biofacies maps, preparation of stratigraphic cross- sections and palaeogeographic synthesis; regional and global stratigraphic cycles.

#### List of Books:

- 1. Miall, A.D. Principles of Sedimentary Basin Analysis, 3rd Ed, Springer-Verlag, Berlin, 2000.
- 2. Busby, C.J. and Ingersoll, R.V. Tectonics of Sedimentary Basins, Blackwell Sc, Oxford, 1995.
- 3. Reading, H. Sedimentary Environments: Processes, Facies and Stratigraphy, Blackwell Sc, Oxford, 1996..

## GLO-215: Natural Resource & Environmental Management

3-0-0 = 3 Credits

Description of the resource. Classification of natural resources. Non-renewable Resources: Minerals Energy Resources: natural gas, oil, coal, atomic minerals. Renewable resources: Water and forests Functions and Values of the resource. Utility to humans and human-influence on the mineral resources. Supply and Demand. Ecological and social concerns. Conflicts involved in resource exploitation. Policies and the legislation concerning the natural resources. National mineral policy. Coastal resources and coastal processes Coastal zone management. Air pollution and controlling measures Forest conservation. Environmental Impact analysis.

Watershed management. Wetland: definition, classification, restoration and protection. Groundwater and wetland conservation Waste water management. Soil resources, types of soils, policies on soil conservation. River resources and flood control. Alternative Energy Resources, Global warming.

#### List of Books

- 1. U. Aswathanarayana. Mineral resources Management and the Environment. Taylor &
- 1. Francis e--Library 2005
- 2. Holecheck, J. L. and others: Natural Resources: ecology, economics and policy, Prentice
- 2. Hall Education
- 3. Shenk, T. M., and others: Modelling in natural resource management development,
- 3. interpretation and applications Island Press
- 4. Wondolleck, J. M., and Yaffee S. L.: Making Collaboration Work Lessons from Innovation in Natural Resource Management, Island Press.

## **GLO-216: Engineering Geology**

3-0-0 = 3 Credits

Introduction: Geology and civil engineering- Engineering properties of rocks and soils: Classification-rock strength- methods of determination-field and laboratory tests.

Geological information for slope stabilization-rock excavation-ground subsidence and landslides-coastal protection structures.

Dams and Tunnels: Dams and tunnels-design and construction, geological investigations, geotechnical problems related to groundwater occurrence, methods of site investigation, introduction to bridges.

Foundation Geology: Determination of bed rock depth-identification of fractures and zones of weakness-shear and cohesive and frictional strength- failure criteria - RQD-RMR-pore water pressure - borehole logging- panel diagram- types of foundations. Geophysical methods in foundation engineering.

#### List of books:

- 1. Krynine and Judd. Principles of Engineering geology and getechnology. McGraw Hill, 1962.
- 2. Chandler R.J. Slope stability and engineering developments 1992
- 3. Sathy Narayanaswami. Engineering geology. Dhanpat Rai Publishers and co., Delhi, 1994 4. Waltham, A.C. Foundations of engineering geology, Blackie Acad. Prof. Pub., I Ed, 1994.

4. Vellejo & Mercedes Ferrer: Geological Engineering, CRC Press.

## **GLO-217: Sedimentary Facies and Environments**

3-0-0 = 3 credits

Modern and ancient sedimentary environments: processes & products- rivers, lakes, eolian, glaciers, shallow seas, delta, estuaries and deep marine, interpreting ancient depositional environments. Concept of sedimentary facies, paleocurrents and provenance; Sequence stratigraphy and sea level changes. Sedimentary basins- classifications; introduction to basin analysis.

#### List of books

- 1. Nicholls, G.: Sedimentology and Stratigraphy. Wiley-Blackwell, 1999.
- 2. Prothero, D.R. and Schwab, F. Sedimentary Geology: An Introduction to Sedimentary Rocks and Stratigraphy, 2nd Edn., W.H. Freeman, 2003.
- 3. Selley, R.C.,: Applied sedimentology, 2nd Edn., Academic Press, 2000.
- 4. Reading, H. G.: Sedimentary environments & facies, 1985.
- 5. Selly, R. C.: Ancient Sedimentary environments, 1978

## **GLO-218: Statistical Geology**

3-0-0 = 3 credits

Introduction and scope of statistical and mathematical applications in geology. Data collection and preparation. Univariate and bivariate statistics. Testing hypothesis. Non-parametric statistics. Directional data and circular statistics. Temporal and spatial data analysis. Multivariate statistical methods. Introduction to computing techniques, use of computers & software in statistical analyses of geological data.

## List of Books

1. Davis, J. C.: Statistical methods in Geology, J Wiley Publ.

## **GLO-219: Industrial Mineralogy**

3-0-0 = 3 credits

Introduction to industrial raw material. Specifications of raw materials used in following industries: ceramics, abrasives, construction, cement, fertilizers, paints, electronics, chemicals. Outline of techniques used in testing raw materials. Introduction to gems, basic properties of gems, formation of gem stones. Identification with the help of refractometer, polariscope, dichroscope and spectroscope Methods of determination of specific gravity Causes of colour in gem stones.

#### List of Books

- 1. Deb, S.: Industrial Minerals and Rocks of India
- 2. Krishnaswamy, S.: India's Mineral Resources
- 3. Gokhale and Rao: Ore Deposits of India
- 4. Phillips, W. J. and Phillips, N.: An introduction to Mineralogy for Geologists
- 5. P. G. Read: Gemmology
- 6. Karanth: Gem and Gem Industry in India
- 7. Webster: Gems their source, descriptions and identification.

## **GLO-220: Pre Cambrian Crustal Evolution**

1-1-0=2 credits

Distribution and tectonic setting of Precambrian crust: Global distribution, Paleomagnetism and continental reconstructions; Orogenies and tectonic cycles; Geologic setting of some cratons: Indian shield, Greenland shield, African shield, Antarctic craton; Nature of Archean crust: Dharwar craton, Southern granulite terrain, Eastern Ghat Belt, Singbhum craton, Aravalli craton, Bhandara craton, Mineralization associated with Precambrian shields; Early Proterozoic crust; Mid-Proterozoic crust; Evolution of the continental crust: Introduction, Archean heat flow and geotherms, Granitoid associations, Composition of continental crust, High grade metamorphic terrains, Banded Iron Formations, Uraniferous Conglomerates; Proposed models for evolution of the continental crust

#### List of Books:

- 1. Kent Condie. Plate tectonics and crustal Crustal evolution -
- 2. Kent Condie. Archean greenstone belts -
- 3. Keary and others. Global tectonics -

- 4. Miller, Holdsworth et al. Continental reactivation and reworking ed:
- 5. Coward and Ries Collision tectonics.

#### **GLO-221: Mineral Economics**

1-1-0 = 2 Credits

Mineral economics Introduction and concepts; Peculiarities inherent to Mineral industry; World Resources of Minerals; Mining Laws; Law of sea bed for Marine mineral resources; Mines & Mineral legislation of India; Mineral taxation & Incentive measures; Tenor, Grade and specifications; Strategic, Critical and Essential Minerals; National Mineral Policy: Basic features, regulations of minerals; Role of states in mineral development; Mineral export policy, taxation.

#### List of Books:

- 1. Sinha, R. K. & Sharma, N. L. Mineral economics. 3 Ed., Oxford&IBH Publ., 1980.
- 2. IBM publication on National Mineral Policy

## **GLO-222: Climate Geology**

1-1-0 = 2 credits

Introduction to climatic geology, atmosphere, lithosphere and ocean dynamics, paleoclimate, geoliology. Antarctica and study of ice sheets global warming, atmospheric aerosols and air pollution, framework of climate change, Milankovitch cycles and solar activity, climate modelling.

#### List of Books:

- 1. Ahrens C.D., Meteorology Today, An Introduction to Weather, Climate, and the Environment, 7th ed. Thomson Brooks/Cole, 2003.
- 2. Oliver J.E. & Hidore, J.J. Climatology, An Atmospheric Science, 2nd edn. Prentice Hall, 2002.
- 3. Kump, L.R., Kasting, J.F. and Crane, R.G., The Earth System, 2nd ed, Prentice Hall, 2004.
- 4. Oerlemans, J., Glaciers and climate change. A.A Balkema, 2001.

## **GLO-223: Trace Element Geochemistry**

1-0-0 = 1 Credit

Beginnings of geochemistry; Thermodynamic consideration of TE solid solutions; Partition coefficient; Ionic model for bonding and the role of ionic radii in understanding the partitioning of trace elements between phases; Nomenclature for trace element classification; Determination of partition coefficients; Fractional crystallization; Fractional melting; Complex melting models List of Books

- Wood, B. J., and D. G. Fraser. Elementary Thermodynamics for Geologists. New York, NY: Oxford University Press, 1977
- 2. McSween, H. Y., Jr., S. M. Richardson, and M. E. Uhle. Geochemistry: Pathways and Processes. New York, NY: Columbia University Press, 2003
- 3. Rollinson, H. R. Using Geochemical Data: Evaluation, Presentation, Interpretation. Harlow, Essex, England: Longman Group, 1993.
- 4. Albarede, F. Introduction to Geochemical Modeling. New York, NY: Cambridge University Press, 1995
- 5. Shaw, D. M. Trace Elements in Magmas. New York, Cambridge University Press, 2006.
- 6. Denbigh, K. The Principles of Chemical Equilibrium. New York, NY: Cambridge University Press, 1981.
- 7. Mason and Moore Introduction to geochemistry
- 8. Krauskopf: Introduction to geochemistry
- 9. Walther, John V: Essentials of geochemistry Henderson: Inorganic geochemistry.

#### **GLO-224: GPR Applications**

1-0-0 = 1 Credit

Introduction; Basics principles; Electric and Magnetic properties of rocks, soils and fluids; GPR system design; Antennas; GPR data processing, modeling and analysis; Applications of GPR. List of Books:

- 1. Harry, M.J. GPR theory and applications, 543p, Elsevier. 2009
- 2. Saleh, B. Introduction to sub-surface imaging, Cambridge University Press, 456p, 2011

## **GLO-225: Digital Image Processing**

1-0-0 = 1 credits

Introduction - Image acquisition, digital data formats, software; Preprocessing: Radiometric and Geometric Corrections; Image Enhancements; Classification: unsupervised and supervised;

Ground Truth; Accuracy assessment; Change Detection.

## List of Books:

- 1. Campbell, J. B & Wynee, R.H. Introduction to Remote Sensing, 5 Ed. Guilford Press, 718p, 2011
- 2. Rees, W. G. 2001. Physical principles of Remote Sensing. 369p. Cambridge University Press, 2001.
- 3. Jenson, J. 1998. Digital Image Processing

## **GLO-226: Glaciology**

1-1-0=2 Credits

Introduction to Global Glaciations; Mass Blance and mechanism of Ice Flow; Glacial Erosion: Processes & Landofrms; Glacial ransport Sedimentation: Glacial depositional landforms; Palaeoglaciology.

List of

## Books:

1. Bennette, M. R & Glasseer, N. F. Glacial Geology; Ice Sheets & Landforms; 402p, Wiley Blackwell, 2009

## **GLO-227:** Geoscience Data Mining

1-1-0 = 2 Credits

Course coordinator will assign the topics (separate for each student) and the students offered to the program are expected to do an in depth review of literature of the papers published in that topic/item and the data gathered through the same to be subjected to the thorough analysis and interpretation. Student can use the relevant software/programs for the quantitative analysis/plotting the data gathered. Final outcome in the form of Detailed write-up is submitted for assessment. List of Books

1. Books based on the topic and as suggested by the Course Instructor

## **GLO-228: Term Paper**

1-1-0 = 2 Credits

Course coordinator will assign the topic to ALL the students offered to the program and the students are required to spend time at home/library/department of visit the libraries outside university in Goa and outside Goa to read the relevant literature and they are expected to answer the questions at various examinations for assessment.

List of Books and journals relevant to the topic assigned by the Coordinator.

## **GLO-229: Minor Project**

1-1-0 = 2 Credits

Students offering to the course are expected to work under the supervision of the course coordinator on the assigned topics of the project (as individual or in groups) as assigned and undertake such field/laboratory work required for the project and finally to submit the project report.

List of Books and journals relevant to the topic assigned by the Coordinator.

## **GLO-230: Hydrogeological Problems and Management**

3-0-0 = 3 Credits

Introduction to hydrogeology, aquifers and aquifer parameters. Relevance of hydrogeology in various developmental activities. Concepts of drainage and groundwater basins. Water table and piezometric surface. Groundwater flow and Darcy's law. Groundwater problems related to foundation work, mining, canals and tunnels. Problems of overexploitation and groundwater mining. Groundwater development in urban areas and coastal regions. Rainwater harvesting and water conservation techniques. Artificial recharge methods. Groundwater problems in arid regions and remediation. Groundwater balance and methods of estimation. Groundwater legislation. Sustainability criteria and managing renewable and nonrenewable groundwater resources. Ground water pollution- sources and remediation. Water logging and remediation. Impact of climate change on groundwater availability and quality. Impact assessment of anthropogenic activities on groundwater resources. Impact of agricultural modernization on groundwater regime. Groundwater provinces of India.

## List of Books

- 1. Todd D.K. Groundwater hydrology, John Wiley, NY, 1980
- 2. Raghunath, H.M. Ground Water, New Age International Publishers, 2007

- 3. Fetter, C.W. Applied hydrogeology, NY, Macmillon, 1994
- 4. Davis and De Wiest, Hydrogeology
- 5. Keller, E.A. Environmental Geology, Columbus, 1985
- 6. Coates, D.R. Environmental Geology, John Wiley, 1981

#### **GLO-231:** Well Site Geology

2-0-0 = 2 credits

Geologists' Role, duties and responsibilities; Drill cuttings - evaluation; Evaluation of hydrocarbon shows; Baises of drilling; LithoLog/StripLog and GTO preparation; Mud logging operations and Supervision of Mud Logging Operations; Coring - Process & practices; Wireline logging Runs-participation, MWD; Drill Stem Testing (DST); Interpretation of Formation Test of Results; Well site communications; Equipment, Techniques and Procedures.

## List of Books:

1. Well Site geology - Reference Guide; Baker Hughes Inteq, 2003.

## **GLO-232: Petrophysics**

2-0-0 = 2 credits

Fundamentals of petrophysics. Porosity, permeability, capillary action in porous media, relative permeability, Interaction between petrophysical parameters. Borehole environment. Invasion profiles and invasion characteristics. Hydrocarbon mobility. Acquisition of petrophysical data. Data quality assurance. Presentation of petrophysical data. Measurement of natural gamma rays. Formation waters, Importance of formation water characteristics. The SP curve. Well-site log evaluation. Formation resistivities. Shallow and deep resistively measuring devices. Fluid zones and capillary pressure, capillary pressure saturation. Case studies with well log, core analysis and well pressure data.

#### List of Books:

- 1. Tiab, D & Donaldson, E.C. Petrophysics. 2<sup>nd</sup> Ed., Gulf Professional Publishers (Elsevier)
- 2. Zinszner, B & pellerin, F.M. A geoscientists' guide to Petrophysics, IFP Publ, 363p.
- 3. Krygoloski, D. -Guide to Petrophysical Interpretation. 147p, (Austin, Texas)

#### **GLO-233:** Well logging

2-0-0 = 2 credits

Well logging and geology, Formation evaluation, Archie's formulae, Well drilling technology, Drilling fluids, Borehole environment, Invasion profiles, Principles, methods and application of logging tools including Spontaneous polarization, Resistivity, Microresistivity, Induction, Sonic, Density, Litho-density, Neutron, Pulsed neutron, Natural Gamma ray, Gamma ray spectrometry, Cement bond, Variable density, Caliper, Dipmeter, Formation microscanner and imager. Well log interpretation - quick look techniques, Hingle, Pickett, MID, M-N cross plots, saturation estimation, lithology, porosity and permeability determination, Log interpretation case studies.

## List of Books:

- 1. Asquith, G.B and Gibson, C. R. Basic well log analyses for Geologists. AAPG Publ, 234p.
- 2. Lecture Notes on Basic log interpretation. HLS Asia Ltd., 56p., 2007

#### **GLO-234:** Geoheritage

2-0-0 = 2 Credits

Introduction to Geoheritage, Geodiversity, Geoconservation; Geopark models - American, European and Australian. Geological outcrops and society. Geopark examples; Geosites, Geotourism. Role of local, state and national governments.

## List of Books:

- 1. UNESCO publications on Geoheritage, Geoparks.
- 2. Web resources on geoheritage

## GLO-235: Palaeo-Palynology

2-0-0 = 2 Credits

Introduction to palynology; Laboratory methodologies; Natural history of palynomorphs;

Spores/Pollens: Basic Biology, Morphology; Stratigraphic Palynology; Palynoflora; Palynofacies paleoenvironmental interpretation; applications

#### List of Books

- 1. Amstrong, H.A. and Brasier, M. Microfossils. Blackwell, 2004.
- 2. Jansonius, J. and McGregor, D.C. (Eds.) Palynology: Principles and Applications. AASP foundation, 1996.

## **GLO-236:** Advanced Structural Analysis

2-0-0 = 2 Credits

Shear Zone: faults, definition, mechanism of formation, fault and earthquake, P-wave fast motion analysis, rock types in a faulted zone, cataclasites and pseudotachylites, formation and analysis, shape and size analysis of clasts, ductile shear zone, definition, simple shear and pure shear deformation, two dimensional and three dimensional strain, transpression and transtension, strain pattern in transpression and transtension, kinematics of the ductile shear zone, riedel shears, volume strain, computation of strain, extensional veins and progressive deformation, examples of crustal scale shear zone and their implication in plate dynamics.

## List of Books:

- 1. Van der Pluijm,B.A. and Marshak, S. An Introduction to Structural Geology and Tectonics, Second Edition, W.W. Norton & Company, London, 2003.
- 2. Ramsay, J. G. and Huber, M. I. The Techniques of Modern Structural Geology, Vol. 1. Strain Analysis, Academic Press, London, 1983.
- 3. Ramsay, J. G. and Huber, M. I. The Techniques of Modern Structural Geology, Vol. 2. Fold and Fractures, Academic Press, London, 1987.
- 4. Ramsay, J.G. and Lisle, R. The Techniques of Modern Structural Geology, Vol. 3. Application of Continuum Mechanics in Structural Geology, Academic Press, London, 2000

## **GLO-237: Geodesy Surveying, GPS**

2-0-0 = 2 Credits

Basis of surveying: Definition, principles, types and various applications of surveying. Scale and reference frame of a map or plan. Geodetic reference frames and coordinate transformations - various reference systems and map projections. Leveling, distance measurement, angles and directions, theodolites, total stations, traverse surveys. Topographic surveying and mapping, Great Triangulation Survey. Satellite positioning, time systems, satellite orbit and signals, Atmospheric effects, GPS observables and data processing, Precision analysis and high precision GPS, Applications of GPS.

#### List of Books:

- Kavanagh, B., Surveying Principles and Applications . Prentice Hall, 2008
- 2. Leick, A., GPS Satellite Surveying. John Wiley and Sons, 2004.
- 3. Hoffmann-Wellenhof, B., Lichtenegger, H. & Collins, GPS Theory and Practice. Springer, 2001

## **GLO-238: Petroliferous Basins of India**

3-0-0=3 Credits

Types of petroliferous basins, relations between basin type and hydrocarbon richness; classification of petroliferous basins of India; Stratigraphy, structure and petroleum geology: Assam shelf, Cambay, Bombay offshore basins, K-G basin, Cauvery basin and Rajasthan Basins; Potential source rocks, reservoir rocks and exploration targets of Mahanadi, Bengal, Kutch, Saurashtra and Rajasthan Basins; Curent status of exploration and prospects in Indo-Gangetic plains, Kashmir valley and Vindhyan Basins.

## List of Books:

- Bhandari, L.L., Venkatachala, B.S., Kumar, R., Swamy, S.N., Garga, P. and Srivastava,
   D.C. (Eds.) Petroliferous Basins of India, Petroleum Asia Journal, Himachal Times Group, 1983
- Biswas, S.K., Dave, A., Garg, P., Pandey, J., Maithani, A. and Thomas, N.J. (Eds.). Proceedings of 2nd Seminar on Petroliferous Basins of India, Dehra Dun, Dec.18-20, 1991, Vol. 1 & 2, Indian Petroleum Publishers, Dehra Dun, 1993.

- 3. Biswas, S.K., Dave, A., Garg, P., Pandey, J., Maithani, A. and Thomas, N.J. (Eds.). Proceedings of 2nd Seminar on Petroleum basins of India, Dehra Dun, Dec. 18-20, 1991, Vol.3, Indian Petroleum Publishers, Dehra Dun, 1994.
- 4. Singh, L. Oil and Gas Field of India, Indian Petroleum Publishers, Dehra Dun, 2000.

## **GLO-239: Geomorphology**

3-0-0 = 3 Credits

Introduction to Geomorphology; Tectonic Geomorphology; Weathering Processes and Landforms; Mass Wasting Processes and Landforms; Glaciers and Glacial Processes; Glacier Processes and Landforms; Periglacial Processes and Landforms; Fluvial Processes and Landforms; Topic 9: Coastal Processes and Landforms; Geomorphology of Aeolian Landscapes; Geomorphology of Karstic Landscapes; Applied Geomorphology.

#### List of Books:

- 1. Bird, E. C. F. (2000) Coastal Geomorphology: An Introduction. Chichester: JohnWiley & Sons.
- Goudie (Ed.) Encyclopedia of Geomorphology, Vol 1 & 2; Routledge-Taylor & Francis;
   2004
- 3. Richard Huggett. Fundamentals of Geomorphology 2nd Edition. 2007. Routledge-Taylor & Francis
- 4. Smithson et al. Fundamentals of the Physical Environment 4th edition.
- 5. Summerfield, M.A 2005. GlobalGeomorphology
- 6. Thornbury, W. D. (1954) Principles of Geomorphology, 1st edn. New York: JohnWiley & Sons.

## GLO-240: Basics of RS, GIS and GNSS

3-0-0 = 3 Credits

Course Content as per the IIRS-ISRO offered Course in Distance/Internet Mode using EDUSAT facility

## **GLO-241: Geoscience and Society**

2-0-0 = 2 Credits

Application of fundamental geological principles to issues of concern to society such as global climate change; wildfires; drought and water resources; earthquake, volcano, and tsunami hazards; medical geology; energy resources; sustainability; coastal processes

## **GLO-242: Internship in Geoscience**

0-0-3 = 3 Credits

Preparation of written report and oral presentation to Department summarizing internship experience and evaluating the applicability of academic experience to job situations and the impact of the internship experience on academic and career plans. Students with summer /winter internship must pre-register for the corresponding semester. Internship can be undertaken at any scientific/research/professional (private/govt) organizations related to Geosciences

## **GLO-243: Geoscience Software**

0-0-2 = 2 Credits

Introduction to applications of computers in geosciences; Most common geoscience software; Data entry, data import, charts preperation, Data analysis using Surfer, Rockware Utilities, Rock Works.

## List of Books:

- 1. Manuals of software (soft copies)
- 2. Help documentation built-in software
- 3. Web resources

## **GLO-244: Seminar Participation**

0-0-1 = 1 credit

Participation of Students at any Regional/National/International seminars/ conferences/ workshops - Attendance or paper presentation undergoing specialized training. Students are required to submit a detailed report on their participation and the knowledge gained from technical presentations.

## GL O-245: Physical Training / Sports Participation

0-0-1 = 1 credit

Students to show their participation in sports/physical training on a regular basis, to maintain a

diary and obtain a certificate from the sports/PT instructor	
GLO-246: Practical of GLO-201 (Groundwater Geology)	0-0-1 = 1 credit
Groundwater flow net construction and interpretations; Graphical plot	
of chemical quality data of waters; Analysis of aquifer test data;	
groundwater recharge, groundwater volume, balance.	<i>8</i> -
GLO-247: Practical of GLO-202 (Petroleum Geology)	0-0-1 = 1 credit
Determination of moisture content and the porosity of rocks. Determination	tion of direction,
amount of dip and the of reservoirs from the given bore hole data. Interp	
method for the determination of depth of oil bearing horizons. Well-log	interpretation
GLO-248: Practical of GLO-203 (Exploration Geophysics)	0-0-1 = 1 credit
Field survey using resistivity methods. Interpretation of resistivity data u	ising master curves
matching and digital techniques; Interpretation of seismic refraction and	reflection data; Field
survey using magnetometers and data interpretation; Interpretation of w	ell logs
GLO-249: Practical of GLO-204 (Micropaleontology)	0-0-1 = 1 credit
Extraction of microfossils from geologic formations and sediments using s	
Sorting and identification and morphological description, classification of	microfossils.
Quantification of microfossils of different species	
GLO-250: Practical of GLO-205 (Environmental Geology)	0-0-1 = 1 credit
Preparation of global and Indian natural hazard maps; Interpretation of t	
in the subsurface based on given data; Preparation of local level maps of	
studies; Preparation of groundwater flow nets and assessment of probab	
movement in the subsurface; Problem solving on movement of pollutant	ts in the subsurface
using simple computer assisted models.	
GLO-251: Practical of GLO-206 (Remote Sensing)	0-0-1 = 1 credit
Study and Visual Interpretation Aerial Photos. Photogrammetric measur	rements (Scale, Height,
stereo Parallax etc.). Digital Image Processing analysis	
1	I
GLO-252: Practical of GLO-207 (Marine Geology)	0-0-1 = 1 credit
Analysis of seawater samples, study of marine minerals in hand specime	en, preparation of
	en, preparation of ectonics
Analysis of seawater samples, study of marine minerals in hand specime	en, preparation of
Analysis of seawater samples, study of marine minerals in hand specime ocean resource distribution maps and maps of ocean morphometry and t	en, preparation of ectonics  0-0-1 = 1 credit
Analysis of seawater samples, study of marine minerals in hand specime ocean resource distribution maps and maps of ocean morphometry and to GLO-253: Practical of GLO-208 (GIS)  Creating Spatial and non-spatial (attribute) data. (Creating Polygon, lire attribute data table; etc.). Correcting errors, structure and restructure of	en, preparation of ectonics  0-0-1 = 1 credit  ne and point vectors; f data. Transformation

	GLO-213. Tractical of GLO-236 (renomerous basins of midia)	0-0-1 - 1 CI CUIL	

Plotting and categorisation of sedimentary basins on outline maps of India based on hydrocarbon potential. Stratigraphic correlation of various petroliferous basins of India. Evaluation of basin potential using published data. Plotting of latitude and longitudes of a location on topographic maps.

## **GLO-274: Practical of GLO-239** (Geomorphology)

0-0-1 = 1 credit

Analysis of drainage pattern from Survey of India toposheets, demarcation of watershed boundaries, stream ordering, study of morphological features using Google images, local field visits. Mapping of lineaments and faults using google images and drainage network geometry. Land use/land cover mapping, surface water body mapping and area computation

## GLO-275: Practical of GLO-240 (Basics of RS, GIS and GNSS)

0-0-1 = 1 credit

Practicals as provided under IIRS-ISRO Edusat Online course

## **GLC-276: Palaeontology**

3-0-0 = 3 credit

Introduction: Nature of the fossil record, taphonomy; allometry and heterochrony; species concepts and systematics - nomenclature, classification and phylogenetics; evolutionary rates and trends; global diversity and extinction, mass extinctions. Applications of fossils in stratigraphic correlation and sequence stratigraphy. Sampling and sample preparation techniques for microfossils, morphology and classification of foraminifera, study of common benthic and planktonic foraminifera. Stratigraphic palaeontology of India.

#### List of Books:

- 1. Foote, M & Miller, A.I. Principles of Paleontology, 3<sup>rd</sup> ed. Freeman & Company, 2007.
- 2. Clarkson, E.N.K. Invertebrate Paleontology and Evolution, 4<sup>th</sup> ed, Blackwell Sc, 1998.
- Prothero, D.R. Bringing Fossils to Life: An Introduction to Paleobiology. Mc Graw Hill, 1998.
- 4. Armstrong, H.A. and Brasier, M.D. Microfossils, 2<sup>nd</sup> Ed, Blackwell Publishing, 2005.

## **GLO-277: Practical of GLC-106** (Palaeontology)

0-0-1 = 1 credit

Techniques of sample preparation of fossils, biostratigraphic correlation, study of morphology and classification of foraminifera, paleogeography through time, stratigraphic palaeontology of India

## GLO-278: QGIS for Professionals (Internet based self-learning Course) 0-0-2 = 2 Credits

Tutor assisted-cum-self-learning Course: Open source software & QGIS; Installing & Exploring QGIS interface; Spatial Data loading into QGIS; Attribute Data input and linking to Spatial Data (with online available data sets);; Vector Data Creation and editing; Spatial Analyses: Vector and Raster analyses; Geoprocessing framework. Introduction to Extending QGIS with Python.

Assessment and evaluation is based on the assignments given by the tutor and the interaction (through chat/email/skype and other communications)

#### List of Books

- 1. Luigi Pirelli. Mastering QGIS, Packt Publishing, 2015
- 2. Kurt Menke. Discover QGIS Workbook for the GeoAcademy Curriculum, Locate Press, 2016
- 3. Anita Graser, Learning QGIS, 3<sup>rd</sup> Ed., Packt Publishing, 2016
- 4. Alexander Bruy. OGIS By Example, Packt Publishing, 2015
- 5. QGIS: Online Resources Tutorials/Ytube
- 6. QGIS: Training Manual (online), https://docs.ggis.org/2.8/en/docs/training manual/

#### **GLO-279:** Digital terrain analysis (Geomorphometry)

3-0-0=3 Credits

This course focuses on the generation, analysis, classification and application of digital elevation models (DEMs) in combination with remotely sensed data on environmental topics like landform distribution, slope hazards and other processes, both terrestrial and sub-marine. The course gives specialised lectures and training in

- Geomorphometrical description of the earth surface
- Generation of DEMs and interpolation procedures
- Terrain parameterisation
- Topographic based models (snow distribution, energy balance)

- Topographic classification
- Applications of topographic analysis on geomorphological processes and slope hazard
- Sub-marine topography
- Inclusion of remotely sensed data
- Environmental and cartographic modelling

#### List of Books

- 1. John P. Wilson & John C. Gallant (Editors): Terrain Analysis: Principles and Applications, Wiley, 2000.
- 2. Reuter, Hannes I Hengl, Tomislav. Geomorphometry: concepts, software, applications, Elsevier, 2009
- 3. Jasiewicz, J., Zwoliński, Z., Mitasova, H., & Hengl, T. Geomorphometry for Geosciences, Bogucki Wydawnictwo Naukowe, 2015

## **GLO-280: Practical of GLC-279 (Geomorphometry)**

0-0-1=1 Credit

Practicals will be based on the use of sample data (including satellite data) available online and working in GIS software for exercises related to construction of DEM for deriving geomorphometry related parameters and interpretation.
